

Retail Guide to Ordering Plants

Think about how many plants we could sell if they all looked perfect all the time. Unfortunately, that's not how things work. However, with the assistance of this list and the plant comment reports that are emailed weekly, you can ensure that you are ordering plant material at it's peak visual desirability. The better a plant looks when it arrives at your retail location, the faster it will sell! The customer gets a fantastic plant & you get a quick turnaround, everybody wins!

Note: Plants with 'series' or 'all' listed after indicated that all of the varieties we carry will be blooming/ fruiting at that time. It is possible that varieties we do not carry flower/fruit at a different time.
