

Amware Economy Ground Shipping

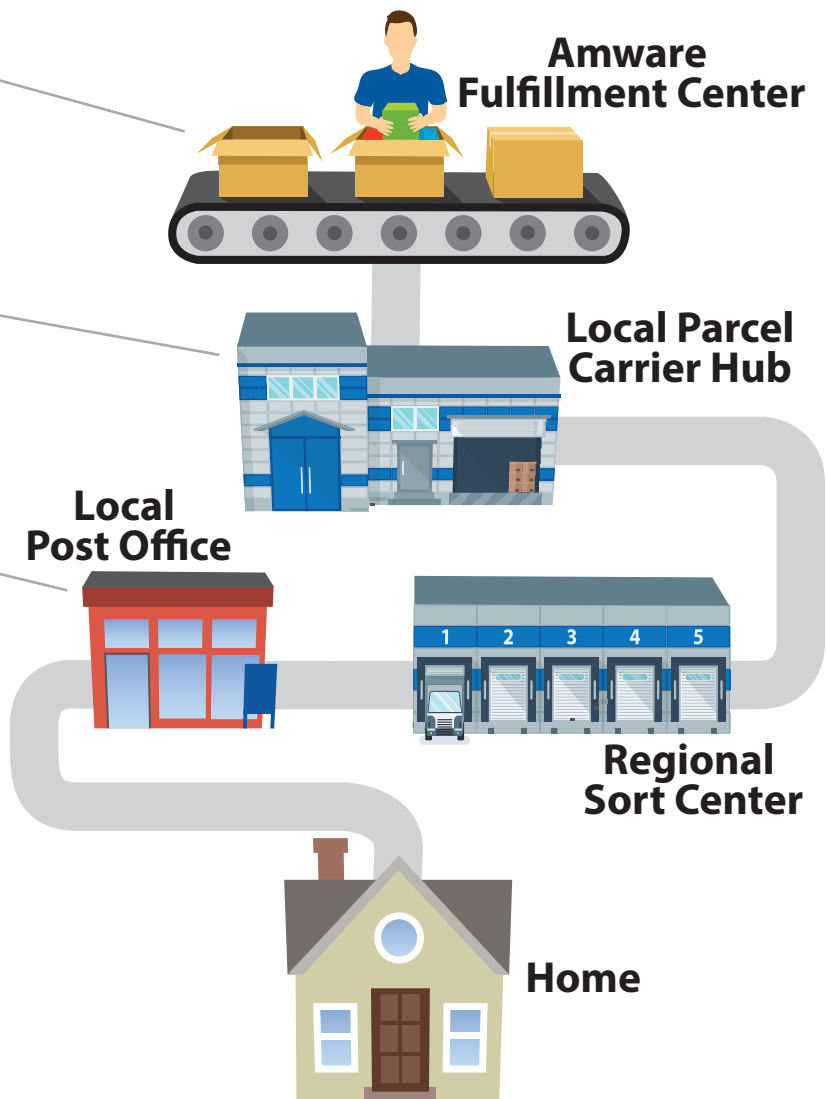

Amware does parcel management as part of an integrated pick/pack/ship fulfillment solution. We combine parcel carrier services and USPS last-mile delivery to lower eCommerce shipping costs.

Eliminate costly, high-zone parcel shipments. Amware has warehouses in 7 major markets across the U.S., allowing you to put inventory close to customers.

Access steep shipping discounts. Amware uses its significant freight volumes across clients to secure low rates with FedEx SmartPost® and DHL Expedited.

Avoid residential delivery surcharges. Our program combines carriers' highly efficient programs for parcel consolidation with USPS' existing infrastructure for daily home delivery.

Get real-time visibility. Carrier tracking codes allow online tracking from pick-up to delivery confirmation.
