JUN

JUL

AUG

- DRUPAL 7.15

SEP

OCT

- DRUPAL 7.16

NOV

- DRUPAL 7.17
- DEUTSCHLAND.de

DEC

- DRUPAL 6.27
- DRUPAL 7.18
- DRUPAL 8 FEATURE FREEZE

HTML5
- Have the most benefit for end users.
- Enable contributed modules and themes to evolve using HTML5.
- Allow theme developers to control where to use the new semantic elements, and opt out entirely if they so choose.
- Adding support for the new form elements to Drupal's Form API.
- Adding new semantic elements in core templates in an appropriate way.
- Adding ARIA roles to markup to improve accessibility.
- Simplifying style and script elements.
- Ensuring input filters and functions accept HTML5 elements.
- Extra Details: http://drupal.org/community-initiatives/drupal-core/html5

MOBILE
- Ability to use Drupal's administrative forms in mobile devices
- All of Drupal 8's core themes should be responsive
- Front-end performance improvements
- Extra Details: http://palantir.net/blog/drupal-8-mobile-initiative

MULTILINGUAL
- Integrate menu, module and setting translations with the same system as content translations to use one unified system

VIEWS IN CORE
- Finally move the Views system properly into core

WEB SERVICES
- Integrating Services into Drupal core, Drupal has a very good Services module but the core is still built for a web browser based setup, this initiative updates a lot of core API features to work better with services such as REST
- Extra Details: http://www.garfieldtech.com/blog/web-services-initiative

CONFIGURATION MANAGEMENT
- Allow configuration changes to be pushed through environments
- Load configurations on demand to save resources

2013

Q1

- DRUPAL 6.28
- DRUPAL 7.19
- DRUPAL 8 FEATURE COMPLETE

Q2

Q3

- DRUPAL 8 CODE FREEZE

Q4

2014

Q1

- DRUPAL 8 ESTIMATED RELEASE
