

# Front-to-Back Solution for Portfolio & Research Management

## Solovis + Synap

Synap's seamless integration with Solovis, a multi-asset class portfolio analysis and management platform, allows users of both applications to easily navigate between funds in Synap and their analytic information in Solovis. This powerful integration allows teams to visualize the entire qualitative and quantitative picture, expediting their decision-making process.

- **Achieve better data integrity:**

Save effort and reduce errors by entering data only once. Synap can receive data entered into Solovis or send information to the platform for selected fields.

- **Easily navigate between quantitative and qualitative data:**

With a click, you can move from the due diligence and manager research notes in Synap to the investment performance in Solovis.

- **Simple configuration:**

As your needs evolve, users can easily set-up and change the configuration between Solovis and Synap, no developer required.
