

Software License Agreement: Third Party Components

Below are terms, notices, and disclaimers for certain third party software included in Retrieve products. The below terms apply only to the software identified in the underlined title; they do not apply to Retrieve proprietary software.

FFmpeg

1. The Software uses FFmpeg under the LGPL 2.1. Licensor does not own FFmpeg. This software uses code of [FFmpeg](#) licensed under the [LGPLv2.1](#) and its source can be downloaded [here](#). Customer may copy and distribute verbatim copies of FFmpeg source code as it receives it, in any medium, provided Customer complies with the following notification requirements:
 - a. The Customer must conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty;
 - b. Customer must keep intact all notices that refer to the license and to the absence of any warranty; and
 - c. Customer must distribute a copy of the license along with the library.
3. Customer may copy and distribute only the FFmpeg library (or a portion of derivative of it) in object code form, provided that Customer:
 - a. Accompanies it with the complete corresponding machine-readable source code on a medium customarily used for transferring software; and
 - b. Complies with the notification requirements described in clause 2.2.
4. If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.
