

## PRODUCT DATA SHEET:

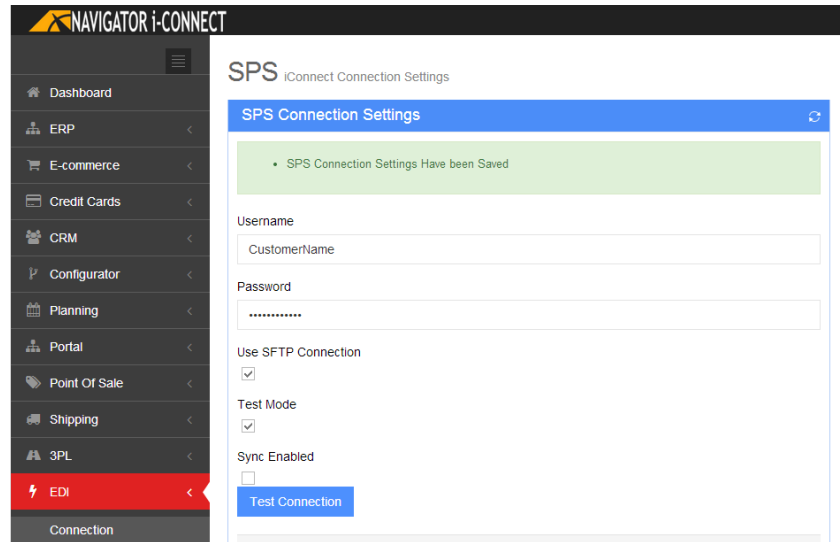

## iConnect EDI for SAP Business One

Powered by Navigator iConnect & SPS Commerce

*Now more than ever before, maintaining a competitive edge requires consistently delivering your products faster, cheaper and more conveniently. In many cases, this is a link that integrates your supply chain with your trading partners using industry-leading SPS Commerce technology. With the EDI connector, powered by SAP Business One and SPS Commerce, your cloud-based ERP delivers deeper functionality than ever before—streamlining your distribution requirements between your existing SAP system and your ever-growing number of trading partners.*

### PRODUCT OVERVIEW

- The EDI Connector, powered by industry-leading SPS Commerce provides a seamless method to completely integrate your SAP Business One and supply chain(s) with an ever-growing number of trading partners.
- Leverages the best-of-breed functionality of SAP Business One. The connector enables a seamless process for exchanging basic and complex commerce documents with your trading partners, whether they be big-box retail stores or local retailers that require EDI.
- Communication with established, national big box stores is made easy; essentially any company running SAP One can now easily exchange documents with their trading partners—all powered by SPS Commerce
- With the connector, there is a two-way translator between the SAP system and your trading partners—making the speed and flow of information quicker and smoother than ever before; ultimately saving your more time, money, and potential logistical headaches.
- The EDI Connector is part of Navigator's Connector Suite which Extends SAP Business One for eCommerce, Salesforce.com, Configurator (CSi), 3PL warehouse, POS (NCR Counterpoint), Imports via 3rd party "CRM" data
