

What People Are Saying

"MAP International has been vitally important in providing us with medicines. We are literally working with life and death situations. There is no question that without intervention, these people are destined for very short lives."

- Africa Renewal Ministries

"MAP's medicines are a miracle supply."

- Trinity Church, Cambodia Mission

"MAP International is a trusted partner who has helped us help families throughout the world... We are grateful that they have come alongside us in bringing tangible help and hope to those who are in need."

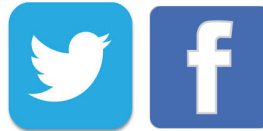

-Convoy of Hope

MAP Medicines Program

MAP International's Medicines Program provides a combination of essential medicines and medical supplies and logistics. Maximizing humanitarian impact practically anywhere on earth, 24 hours a day, 365 days a year.

Who We Are

MAP International is a global Christian health and relief organization that partners with people living in conditions of poverty to save lives and develop healthier families and communities through medical aid and community health development.

Since 1954, MAP International has provided over \$5 billion in medicines and supplies. We serve 10 million people annually in over 100 countries.

Why Medicines?

Half of the world's population lacks regular access to quality, essential medicines. In the most remote communities, organizations provide a large amount of the medicines used to save lives.

We are able to strengthen the impact of humanitarian activities around the world by delivering low-cost purchased medicines as well as promoting the generosity of organizations that donate medical supplies to those who need them the most.

What We Do

MAP's Medicines Program provides low-cost purchased and donated medicines & medical supplies from the WHO Essential Drug List and other customized formularies to humanitarian aid organizations. We access high-quality medicines & supplies globally from trusted manufacturers and wholesalers and effectively delivers them to healthcare agencies and medical assistance programs around the world. A combination of quality products, price, service delivery, and consulting services in supply chain management, rational drug use, and monitoring & evaluation makes MAP's Medicines Program an attractive partner.

MAP provides, from a single source, a combination of essential medicines, supplies, logistics and consulting services required to maximize humanitarian impact practically anywhere on earth, including rural and urban settings and U.N.-defined complex humanitarian emergencies.

Long-term Health

With Long-term Health Development and Short-term Medical Mission product lines, we can meet the medicines, medical supplies, and service needs of international partners as large as the United Nations and as small as a village pharmacy.
