16,000 children under age 5, die each day from preventable diseases. Over 2,000 children die each day from diarrhea alone.

Those deaths could have been prevented with proper medical care and early health preventions. MAP International provides medicines and health supplies to those in need around the world so they might experience life to the fullest.

We're not alone in this fight, we have some amazing partners standing with us.

MAP works with dozens of leading pharmaceutical companies and NGO partners to provide essential medicines and medical supplies where needed most.
