Reducing the Risk of Human Error on Email

ABOUT TRAIANA

Forming part of the NEX Group, Traiana operates the leading market infrastructure for post–trade processing and risk management across asset classes, and provides client service and risk management technology across the financial sector. Global banks, broker/dealers, buyside firms and trading platforms use their cross asset class services to automate risk management and pre–trade/post–trade processing of listed and over the counter transactions.

Reducing the Risk of Human Error on Email

The Problem

Due to sensitivity of the information that Traiana deal with on a regular basis, they set out to find a tool that could prevent misaddressed emails without warning the user every time they sent an external email. They found that Tessian's machine learning approach provided them with the intelligent solution they needed.

The Solution

Tessian was rolled out firm-wide at Traiana. After an initial period, Tessian presented a detailed report containing email statistics and misaddressed emails caught by Guardian. As well as preventing several emails from being sent the wrong recipient, Tessian also provided Traiana with a valuable insight into their email traffic and common sending behaviours.

Tessian is now used by Traiana to prevent multiple potential data leaks every day.

"Tessian Guardian prevented multiple data breaches within months, proving its value almost immediately."

Global Business Manager

Learn more about how Tessian prevents human error on email.

Powered by machine learning, Tessian's Human Layer Security technology understands human behavior and relationships.

⊿ GUARDIAN

Automatically detects and prevents misdirected emails.

⊿ ENFORCER

Automatically detects and prevents data exfiltration attempts.

⊞ DEFENDER

Automatically detects and prevents spear phishing attacks.

Importantly, Tessian's technology automatically updates its understanding of human behavior and evolving relationships through continuous analysis and learning of an organization's email network.
That means it gets smarter over time to keep you protected, wherever and however you work.
