

# PROVIDE CLINICIANS WITH MOBILITY While Enhancing Data Security

## DIGITAL WORKSPACE

### What Is Clinical Mobility?

Clinical mobility is all about transforming the way healthcare organizations provide patient care. Physicians, nurses and other personnel need to access applications and data from anywhere — the hospital, an examination room, even patient homes — on any device.

In the increasingly mobile healthcare environment, how do you balance the need to protect against security breaches and data piracy while also achieving healthcare compliance mandates and meeting clinician IT demands? DynTek can help!

DynTek provides true clinician mobility by deploying secure digital workspace solutions powered by Citrix. Citrix technologies empower you to create a virtualized environment where your physicians and staff can access applications and data from any device, sync and share information through any cloud, and operate securely inside and outside your network.

### The DynTek Digital Workspace

DynTek understands the challenges healthcare organizations face in transforming to a digital workspace. These include how to allow users to access Microsoft applications across a multitude of devices and how to manage a combination of corporate-owned and BYOD devices. It's also challenging to build out desktops on the fly as users log in and then attach applications and profiles that can be delivered in real time.

**To help clients take on these challenges, DynTek provides all the necessary ingredients:**

#### **BEST PRACTICES & TESTED TECHNOLOGIES**

Enable clients to establish an effective mobile workforce — with anywhere access that's also secure and conforms to healthcare industry regulations.

#### **SEAMLESS DESKTOP EXPERIENCE**

Empower doctors, nurses and other clinicians as they move from device to device and collaborate any time of day.

#### **CONSULTATION ON YOUR NEEDS**

Tailored solutions for meeting your specific needs.

#### **CUSTOM ARCHITECTURES**

Easily integrate with existing environments in the cloud and on premises so organizations can continue to leverage productivity systems already deployed.

Following the deployment of your solution, we deliver on-going support and technology consultation services to ensure your digital workspace continues to function optimally and remains primed to leverage new technologies.

# Enable Clinician Mobility, Improve Security, and Reduce Costs

DynTek leverages Citrix XenApp and XenDesktop to design, deploy and support mobile digital workspace solutions that deliver true clinician mobility with secure remote access — from anywhere, at any time, and on any device. Application and desktop virtualization centralizes your critical apps and clinician desktops in the data center and delivers them securely over any network connection.

## ANYWHERE ACCESS TO APPLICATIONS & DESKTOPS

### Mobilize Windows Apps

XenApp is the industry-leading solution for virtual application delivery, providing Microsoft Windows and other apps to physicians and their staff on any device, anywhere:

- ✓ Optimize clinician productivity and user experience with apps on-demand.
- ✓ Streamline IT support of BYOD devices.
- ✓ Provide secure network access and reduce the risk of data loss.
- ✓ Decrease application management cost and complexity.

### Deliver Virtual Desktops

XenDesktop, which includes XenApp, gives your clinicians the freedom to work from anywhere while also enabling you to cut IT costs:

- ✓ Streamline desktop management with desktop virtualization that's both flexible and secure.
- ✓ Boost user productivity by delivering desktop environments to anyone, anywhere.
- ✓ Reduce the risk of data loss or intrusion on any device by centralizing security.

### Citrix Platinum Solution Advisor

Citrix is the leading technology provider when it comes to digital workspace platforms, offering platform solutions to support companies of any size. As a Citrix Platinum Solution Advisor, DynTek's expertise also includes all the supporting technologies from other providers that enable Citrix digital workspace solutions to achieve their full performance potential. We know how to integrate all the moving parts.
