

# WHY SHOULD YOU CONSIDER NETAPP HCI?

As organizations strive to build a next-generation data center strategy where agility, scale, and automation are critical, many are turning to NetApp hyperconverged infrastructure (HCI).

## OVERCOME YOUR DATA CENTER CHALLENGES

NetApp HCI is helping organizations overcome key IT challenges and get past the limitations of previous generations of hyperconverged infrastructure.

**CHALLENGE:**  
**MIXED WORKLOADS**

**WITH NETAPP HCI, YOU CAN...**  
Consolidate all workloads onto one solution without worrying about a "noisy neighbor"

**CHALLENGE:**  
**AUTOMATING IT OPERATIONS**

**WITH NETAPP HCI, YOU CAN...**  
Automate many deployment steps and routine tasks to eliminate user error

**CHALLENGE:**  
**INTELLIGENT SCALING**

**WITH NETAPP HCI, YOU CAN...**  
Scale in ways that don't force you to strand resources and throttle performance

**CHALLENGE:**  
**PROVIDING MORE IT VALUE**

**WITH NETAPP HCI, YOU CAN...**  
Integrate with NetApp Data Fabric to harness the power of your data across any cloud

## HCI DRIVES BENEFITS THROUGHOUT YOUR ORGANIZATION

With NetApp HCI, you can consolidate your workloads, scale intelligently, and deliver the performance that your next-generation data center applications need.

### GUARANTEED PERFORMANCE

Meet SLAs and performance requirements of any app or workload

### FLEXIBLE AND SCALABLE

Scale compute and storage resources independently to avoid over-provisioning

### ROBUST SUITE OF APIS

Integrate into higher-level management, orchestration, and backup/DR tools

### NETAPP DATA FABRIC READY

Unleash the full potential of your data and create new types of IT value

## NETAPP HCI USE CASES

NetApp HCI opens a new range of use cases for both existing NetApp customers and anyone looking to modernize their data center - from the edge to the core.

### PRIVATE CLOUD INFRASTRUCTURE

Accelerate self-service and run your private cloud environments at scale with best-in-class components

### WEB INFRASTRUCTURE

Address demanding web needs with highly scalable and easily automated infrastructure

### WORKLOAD CONSOLIDATION

Run multiple applications and business critical workloads on one solution across your data center

### VDI DEPLOYMENT

Accelerate deployment, increase user satisfaction, and simplify scaling in your VDI environment

## DYNTEK IS A NETAPP EXPERT

At DynTek, we have many implementations under our belt across a variety of customer sizes and industries.

NetApp Gold-certified Partner

Experience with government, education, healthcare, and commercial organizations

Hands-on experience with both small and large-scale deployments

Expertise in complimentary technologies like Cisco, VMware, and Microsoft

## SCHEDULE A MEETING TODAY

To learn how NetApp HCI can support and drive your next-generation data center strategy, reach out today to schedule a meeting with one of our technical experts.
