

Microsoft Learning Solutions

Training & Skills Development to Help you Optimize Your Microsoft Environment

Technical training for your design, implementation, and support engineers is critical to the success of new product deployments, product upgrades, delivering high levels of support for your users, and ensuring the maximum return on your product investments. Trained engineers are better able to manage the existing environment and utilize the capabilities of the products you have implemented to their fullest. As a Microsoft Learning Partner, DynTek offers the latest catalog of Microsoft Official Courses covering a broad range of technologies.

Authorized Courses Taught by Microsoft Certified Instructors

All courses offered by DynTek are vendor-authorized and taught by seasoned, vendor certified instructors. Our instructors are highly skilled engineers with years of practical "real world" experience.

Training: On-site, Off-site, or from your Home or Office

DynTek provides on-site training for our customers with low enrollment thresholds, so you can easily attend the Microsoft training you need to manage the environment. We provide computers (if required), courseware, instructor, and expertise. The ability to conduct classes at your facility allows you to eliminate the expense of travel and time away from the office.

DynTek offers authorized training courses in our state-of-the-art training center in Newport Beach, California and other training facilities throughout the country. In addition, our AttendAnywhere training delivery model allows students to attend classes remotely, eliminating travel costs. All the student needs is a PC and a high-speed Internet connection – we provide everything else.

DynTek also offers customized training to meet your specific business and technical requirements.

DynTek -- Microsoft Platform Solutions

DynTek has developed industry based methodologies to address the Analysis, Design, Proof-of-Concept, Project Planning, Full Scale Deployment and Operations of a broad range of Microsoft® based solutions. We create solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment.
