

Managed Security Services for Premier Members

Premier Healthcare recently awarded DynTek a Group Purchasing Agreement for Hardware, Software and Services in the inaugural Cybersecurity Category – Contract Number PP-IT-232

With the proliferation of advanced threats and ransomware, healthcare organizations are required to establish a comprehensive prevention and detection strategy and timely response and remediation measures to counteract multiple simultaneous security threats. And the effort and cost to assemble and hire your own staff to perform around the clock monitoring can be a daunting task.

Security. Managed. Simplified Focus on your business. We focus on your security.

DynTek provides 24x7x365 threat monitoring, hunting, alerting, and mitigation through a world class Security Operations Center. Your data never leaves your premise. We serve as an extension of your IT and/or your security department. You can focus on your core business knowing your organization's data and assets are protected and secure for a fraction of the cost of hiring full-time security resources.

Our Security Operations Center (SOC) is a state-of-the-art operations offering that leverages the strengths of human intelligence and artificial intelligence. This combination positions us to cutdown on the time it takes to identify real cyber threats to your organization so that real threats can be investigated and responded to faster for increased protection to your business.

DynTek's Managed Security Services Incorporate:

- Advanced 24x7x365 monitoring and alerting of on-premises and cloud workloads
- Combined AI & human intelligence for rapid detection and response
- Subject matter experts with response, forensics, and triage expertise
- Near real-time alerting & management
- Customized solutions based on client needs and risks
- Use of state-of-the-art technology to prevent, detect, and respond to threats – SIEM license included
- Keep or update your existing security tools

Our SOC analysts are security professionals at heart, we don't staff just people who monitor, but rather security minded and trained experts who can properly respond to security alarms.

Comprehensive Security Coverage

We protect your SaaS, Cloud IaaS, and on-premises endpoints with efficiency and trust. Our approach to securing your environment revolves around resiliency. Our team focuses on identifying the potential entry points of hackers, and then informing you of different options that you leverage to protect your network. We partner with you to understand your risk and work on diminishing it via continuous monitoring. As part of our managed security services, we can provide:

- Threat intelligence
- User and entity behavior analysis
- Vulnerability detection
- File integrity monitoring of critical data
- Asset discovery
- Intrusion detection
- Forensics and incident response
- Compliance reporting
- And many other capabilities

Contracted Supplier

The DynTek Solution

DynTek helps design a healthcare security system using an “assumed breach” approach focused on identity and access – the pillars of a dynamic, effective threat defense. This type of security architecture is built around the key elements of the network – endpoints, systems, and data. The DynTek security offering includes legal and regulatory guidance, risk management, data security, security solutions, threat management, and managed service offerings.
