## From the Data Center<sub>to the</sub> Device

### Infrastructure & Data Center Solutions

The foundation of your business lies within a secure infrastructure that supports your enterprise data. And you, like many other businesses today, may be looking to prepare your existing infrastructure to leverage data through the cloud -- internally, virtually or externally – and easily manage it from your desktop. The good news is, DynTek can help!

Not only do we have the technical experience to provide a secure solution that seamlessly aligns with your changing requirements, but we also understand the need to get it right the first time. After all, your infrastructure and data center are the lifeline of your business and connect you to your vital data.

Utilizing on-premise, virtualized and/or cloud-based technology, DynTek offers flexible custom Infrastructure and Data Center Solutions that will take your business to the next level, including:

#### Advanced Networking & Data Center Infrastructure

- Architectures
  - Data Center
  - Collaboration
  - Borderless
- Advanced Routing & Switching
- Unified Computing Systems (UCS)
- Wireless and Mobility
- Security
- Telepresence Video
- IP Video and Surveillance

#### Advanced Security

- Cloud Security
- Network Security
- Compliance & Risk Management
- Data Center Security
- Security Management
- Mobility and BYOD Security

#### Virtualization & Storage

- Server & Desktop Virtualization
- Enterprise Storage
- Server & Storage Consolidations
- Business Continuity
- Virtualization & Systems Management
- Back-up/Archiving
- Cloud Back-up
- Data Migration
- eDiscovery

Yes, we think our technology partner certification tests are fun. We actually recreate them on the weekends just for laughs. We dig on simulators, virtualize the servers in our home lab and, just to be safe, we have extra network storage in our basement. We live it. We breathe it. We love it.

***Technology...it's not just our job - it's our way of life.***

#### Key Benefits:

- Architecture roadmaps to make complex infrastructure manageable
- Technology management with more efficient day-to-day business operations
- Mobility support from the high speed core to voice & video end points
- Reduction in energy consumption and costs
- Flexibility to bridge the gap between on-premise enterprise architecture and the public cloud
- Operational support to optimize your environment

# Transforming the Way You Do Business

With access to cutting-edge technology, DynTek's team of certified specialists develop innovative solutions that transform a business' infrastructure and data center. By remaining fluent in the latest technologies from industry leaders such as Cisco, Citrix, Microsoft, VMware and McAfee, we possess the knowledge to build custom solutions that offer extensive visibility into data center operations and allow companies to effortlessly collect, consolidate and analyze data across their company data center...all available on your device.

Our field-tested deployment expertise and design / architecture best practices allow us to create Data Center

Solutions that quickly and securely adapt to on-premise, virtual and cloud environments, and ensure everything is connected.

The best-run systems start with the best designs and effortlessly move you from the data center to your device. When it comes to building the foundation for your critical business systems...can you afford to not get it right the first time?

## Pride In Partnership

DynTek holds the top medallion levels across a broad range of industry-leading technology manufacturers. When looking for a partner that is **Cisco Gold, Microsoft Gold, Citrix Platinum, McAfee Elite, VMware Premier, Dell Premier**, and more...you will find one - DynTek.

*This means we have an unrivaled cross-section of technical expertise and real-world deployment experience, as well as competitive pricing on the technologies you need most.*
