

HANZO HOLD FOR SLACK

Empowering legal, governance, and compliance teams to manage Slack collaboration data.

BEST PRACTICE INFORMATION GOVERNANCE AND EDISCOVERY COMPLIANCE FOR LARGE COMPLEX TEAMS

Corporations around the globe have adopted Slack to power collaboration, build bridges between teams, scale with unlimited workspaces, and find information rapidly for better business decision making. With the integration of Hanzo Hold in the Slack partner ecosystem, organizations can apply a legal hold—including silent holds—to enterprise Slack communication data, adhere to information governance policies, and meet the duty to preserve data for litigation and compliance.

DEFENSIBLE PRESERVATION

Don't copy and paste the entire Slack database for preservation. Instead map your Slack ecosystem to understand channels and custodians so you can scope what requires preservation and preserve it only once. Know exactly what channels and conversation threads are in-scope.

ECA + DISCOVERY

Assess and analyze information in context to reduce the reviewable data set, flag data for export, or identify additional custodians.

DATA SECURITY + PERMISSIONS

Easily manage and control access and permissions across your team members.

MATTER-CENTRIC WORKFLOWS

Manage legal holds at the matter level to incorporate Slack legal hold management into existing workflows.

TARGETED COLLECTION

Defensibly capture only the Slack data you need, with complete conversational context.

MATTER AUDIT LOG

Hanzo Hold automatically tracks when matters are created and updated, when custodians and channels are added or removed, and displays the audit log for ready access.

PRESERVE EXACTLY WHAT YOU NEED AND NOTHING MORE

Use Hanzo to precisely control your Slack eDiscovery processes and respond effortlessly to eDiscovery and audit requests.

AUDIT

Your Slack workspaces are mapped, **not copied**, helping you identify the scope of information that is subject to preservation requirements without multiplying your data risk.

SCOPE + PRESERVE

Manage the precise preservation of Slack data by custodian, channel, group or direct message with an easy-to-use interface that puts you in control of the data associated with your legal hold matters.

SEARCH

Conduct analysis and early case assessment (ECA) of preserved data with advanced text and metadata search, quickly gaining insight into the data in your Slack environment.

CONTEXTUALIZE

Review your Slack content in context by managing the data at a channel level—no more out of context media and messages. Instantly see what channels are being preserved and collected as part of your matter.

TAG + CULL

Easily cull down information and tag responsive Slack content for export and/or further review—significantly reducing the volume of data that you need to send out for costly review.

EXPORT

Easily package and move data directly from Hanzo into the review platform of your choice to share with your Legal or internal investigation teams.

ABOUT HANZO

Hanzo provides modern ediscovery and compliance software for enterprise organizations. Our solutions empower legal and compliance teams to efficiently manage the preservation, targeted collection and review of dynamic content from enterprise collaboration applications, social media and complex websites. Hanzo is SOC 2® Type 2 certified, demonstrating Hanzo's commitment to data security and serves large corporations across the globe—giving them control, visibility, and context over their data to reduce cost and mitigate risk.
