 - Total Expense Ratios (TERs) Measure the costs of operating the ETF portfolios, including the management fees and costs of the issuing company. The TER is included in price of the ETF product and is not paid directly by the investor.

The NewFunds GOVI ETF tracks the performance of South African Government Bond Total Return Index. This index comprises bonds issued by the South African government, including only those issued in which the Department of Finance obliges the Primary Dealers to make a market

The NewFunds ILBI ETF is a product that provides investors with a convenient and cost-efficient way to get exposure to the performance of the de facto SA Government inflation bond benchmark index. The Barclays/ Absa South African Government Inflation-Linked Bond Index is a total return index comprising SA bonds issued by the South African government that are linked to the South Africa Consumer Price Index (CPI)

The aim of the Ashburton Inflation ETF is to provide investors with a real rate of return above inflation (CPI), through exposure to a diversified portfolio of government inflation-linked bonds. The Ashburton Inflation ETF invests in bonds based on the value issued by National Treasury and is listed on the JSE

The Satrix Inflation-linked Bond ETF tracks the performance of the S&P South Africa Sovereign Inflation-linked Bond 1+ Year Index. This index is a market-value weighted index of South African Rand-denominated inflation-linked securities, which are bonds of which the principal is indexed to the local inflation rate
