Irrigation Management
Valley Dealers
Finance Solutions
Farm Management
Valley Water Management Ancillaries

John Rasic Consulting
Our Ag Solutions team is dedicated to supporting your farm project development and management beyond supplying irrigation equipment. Our experts can advise you on each step of your project development; from the pre-feasibility study to post harvest solutions.

### DESIGNING, ENGINEERING AND PLANNING OF LARGE-SCALE FARM PROJECTS

- Soil survey to narrow potential sites for best soil fertility and potential yields, and create a soil remediation plan
- Topography survey
- Hydrology survey and test wells to identify potential ground water and/or points of extraction for surface water
- Water Corrosion Analysis
- Master center pivot layout with initial overlay of soil and water potential to select area, priorities, phases and restrictions
- Project engineering and design of water and electricity supplies
- Farm development study and operations plan to determine crop rotation, farming equipment, inputs and farm structure

### PROJECT DEVELOPMENT

- Irrigation installation
- Operator training on irrigation and maintenance
- Permanent or contractual farm management
- Driver and operator training on crop husbandry and maintenance

### SERVICE

- Irrigation maintenance and troubleshooting
- Ag machinery maintenance

### FARM MANAGEMENT OPTIONS

- Permanent farm management or consulting
- Ongoing support of existing, local farm management teams (short-term expertise on-site)
- Irrigation scheduling
- Irrigation management with soil moisture sensors and weather station

### FARM ASSESSMENT, RE-ENGINEERING AND STAFF TRAINING

- Appraisal of existing operations
- Irrigation equipment checkup, auditing and calibration
- Monitoring of energy consumption to reduce KWh costs and maximize the reserved time use (with lower energy costs)
- Credit limits and financing tools

FGM Expert Farmer

FGM Expert Farmer is a French company, delivering technical expertise and operational management to large-scale farming projects. It builds its turnover by exporting its services, know-how and qualified experts. FGM helps private investors develop and enhance their agricultural holdings through the use of innovative processes, as well as advanced and cost-saving technologies. With 35 years of international experience in challenging environments and more than 15 major, large-scale farming projects around the world in Sudan, Egypt, Saudi Arabia, Libya, Mali, Ivory Coast, Ukraine, Romania, etc., FGM has demonstrated its skills in designing, developing and operating center pivot irrigated farms.

The team is comprised of senior experts and bilingual farm and crop managers who work side by side in the field, developing innovative methods to increase production, while securing land assets and protecting the environment.

John Rasic Consulting

John Rasic Consulting (JRC) provides soil surveying, soil amelioration and land resource assessment services. Its main focus is on delivering practical solutions for existing and potential soil problems associated with particular land use, and providing programs for the ongoing management of soils for productive, income-generating purposes.

JRC’s mission is to provide high-quality technical information that can guide rational decision-making and help you to achieve your goals.

Valley Water Management

Valley Water Management (VWM) draws on decades of experience from numerous large and small irrigation projects designed by its professional engineering and agricultural teams. It can provide a pumping solution to meet any need, from an individual motor pump to a fully customized project design or large-scale pump station.

VWM works in partnership with Torrent Engineering & Equipment Company, a world-class integrator of pre-fabricated pump stations, to provide the latest technologies and highest quality components to develop reliable and long-lasting systems. VWM pumping stations are custom engineered to meet the specific requirements of each project, which ensures your pump station is as efficient as possible and includes the features you want. This not only saves you money on the initial installation, but saves operating costs through the use of correctly sized pumps and components.

Valmont Irrigation

Valmont Irrigation founded the center pivot irrigation industry in 1954, and the Valley brand is the worldwide leader in sales, service, quality and innovation. With historical sales of more than 200,000 center pivots and linear, Valmont-built equipment annually irrigates approximately 10 million hectares around the world. It remains dedicated to providing innovative, precision irrigation solutions now and into the future.

For more than 30 years, Valmont Irrigation has been committed to the African continent with manufacturing facilities and a growing number of professional dealers specializing in irrigation.

Valmont Industries

Valmont is the global leader, designing and manufacturing highly engineered products that support global infrastructure development and agricultural productivity. Its products for infrastructure serve highway, transportation, wireless communication, electric transmission, and industrial construction and energy markets. Its mechanized irrigation equipment for large-scale agriculture improves farm productivity while conserving fresh water resources for future generations. In addition, Valmont provides coatings services that protect against corrosion and improve the service lives of steel and other metal products.

As a premier solutions provider, Valmont is well prepared to meet agriculture’s growing demands worldwide. We have the leading global network of experienced dealers. We remain passionate about our products and the customers we serve. And, we are steadfast in our commitment to continuous improvement and to providing innovative irrigation solutions to help feed the world.

Valmont Irrigation and Africa

Valmont Irrigation is positioned to support coming opportunities in Africa where only 4% of the cultivated land is irrigated. To meet these growing demands on the African continent, Valmont Irrigation is devoting more resources to the development of African markets. New research and development initiatives include wastewater irrigation solutions, variable rate irrigation, and mechanized irrigation for rice production. Understanding that a more holistic approach is needed for success in African agriculture, Valmont is embarking on new partnerships with investors, governments, aid organizations, farming organizations, universities and development institutions. Valmont Irrigation is also aimed at providing value-added support in mechanized irrigation where agronomic, farm management and irrigation expertise is needed.

Our commitment to successful projects

Valmont Irrigation brings together, through the AgSolutions Team, experts in soil science, irrigation management and farm management.

Our mission is to ensure the success of mechanized irrigated projects by leveraging water resources, commercial farming management and knowledge transfer.

Our objectives are to offer an integrated approach consisting of:

• The most efficient design for your operation based on your field characteristics;
• Premium solutions (mechanized irrigation equipment, pumping stations, hydraulic networks, electrification, etc.);
• Higher yield and best economic benefits through farm and irrigation management, and empowering your people.
