

Body Worn Cameras: An Overview

Body Worn Cameras for police has become a very hot topic; at least 29 states have passed or are considering legislation mandating use by every officer. Police departments in many U.S. cities and municipalities are struggling with how to quickly store and digest the video, then categorize, archive and manage this potential evidence data. It's imperative to have a high-performance, dense and scalable storage solution to accomplish this critical task. Ease of use and reliable tech support are critical factors for police who must maintain custody of this data for extended periods, with limited budgets, and without additional time requirements or administrative headaches.

Best practices call for in-house control of evidence data with the ability to store safety copies securely with a reliable Cloud provider. The U.S. Department of Justice has announced that federal funds are available for police departments to purchase Body Worn Cameras.

WHY Do You Need Body Worn Video?

- Public demand & legislative requirements
- Reduces use of force by 62% and promotes de-escalation
- 92% of complaints supported by BWV are dismissed without further action, reducing costs & improving service quality
- Helps identify "Bad Actors"
- Provides a necessary new layer of protection for officers and the public

WHAT Do You Need?

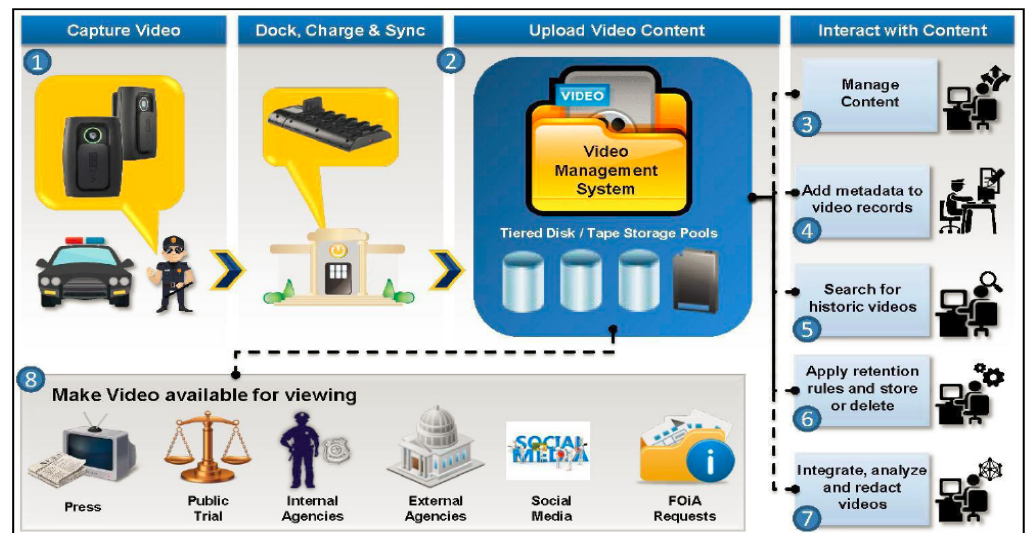

A Pre-Configured, Bundled Solution

- Purpose-built, pre-integrated hardware – servers, storage, cabinet and networking
- Pre-configured VidVault Evidence Management software from Safety Innovations
- Plug and play
- Pre-programmed network switch with optional wireless access points
- Optional IP camera hardware and accessories
- Full 5-year warranty and aftercare support
- Financing and grant-writing assistance

HOW Does It Work?

8 Simple Steps

1. Capture video, dock, charge and sync
2. Upload video content
3. Manage content
4. Add metadata tags
5. Search archived videos
6. Apply retention rules, store or delete
7. Integrate, analyze and redact videos
8. Make video available:
 - Public trial
 - Press
 - Internal agencies
 - External agencies
 - FOIA requests
 - Social media

BENEFITS of Siwel Solution

- Physical video security
- Full control of video inventory
- Buying behavior information, demographic capture
- Proven 99.999% enterprise uptime; peace of mind & reliability
- Best-in-class storage density, modularity, performance, reliability and support
- Scale to any desired amount of surveillance content
