

NetApp Backup & Recovery Solutions Overview

What Would You Do If You Could ...

- ... lower future operating costs by 25% or more?
- ... defer or eliminate 50% of future capital purchases?
- ... immediately write off or retire 25% or more of existing equipment?
- ... get the full power of NetApp's Data Ontap operating system at low risk?

Platinum Partner

V-Series is an Open Storage Controller

NetApp V6000

NetApp V3100

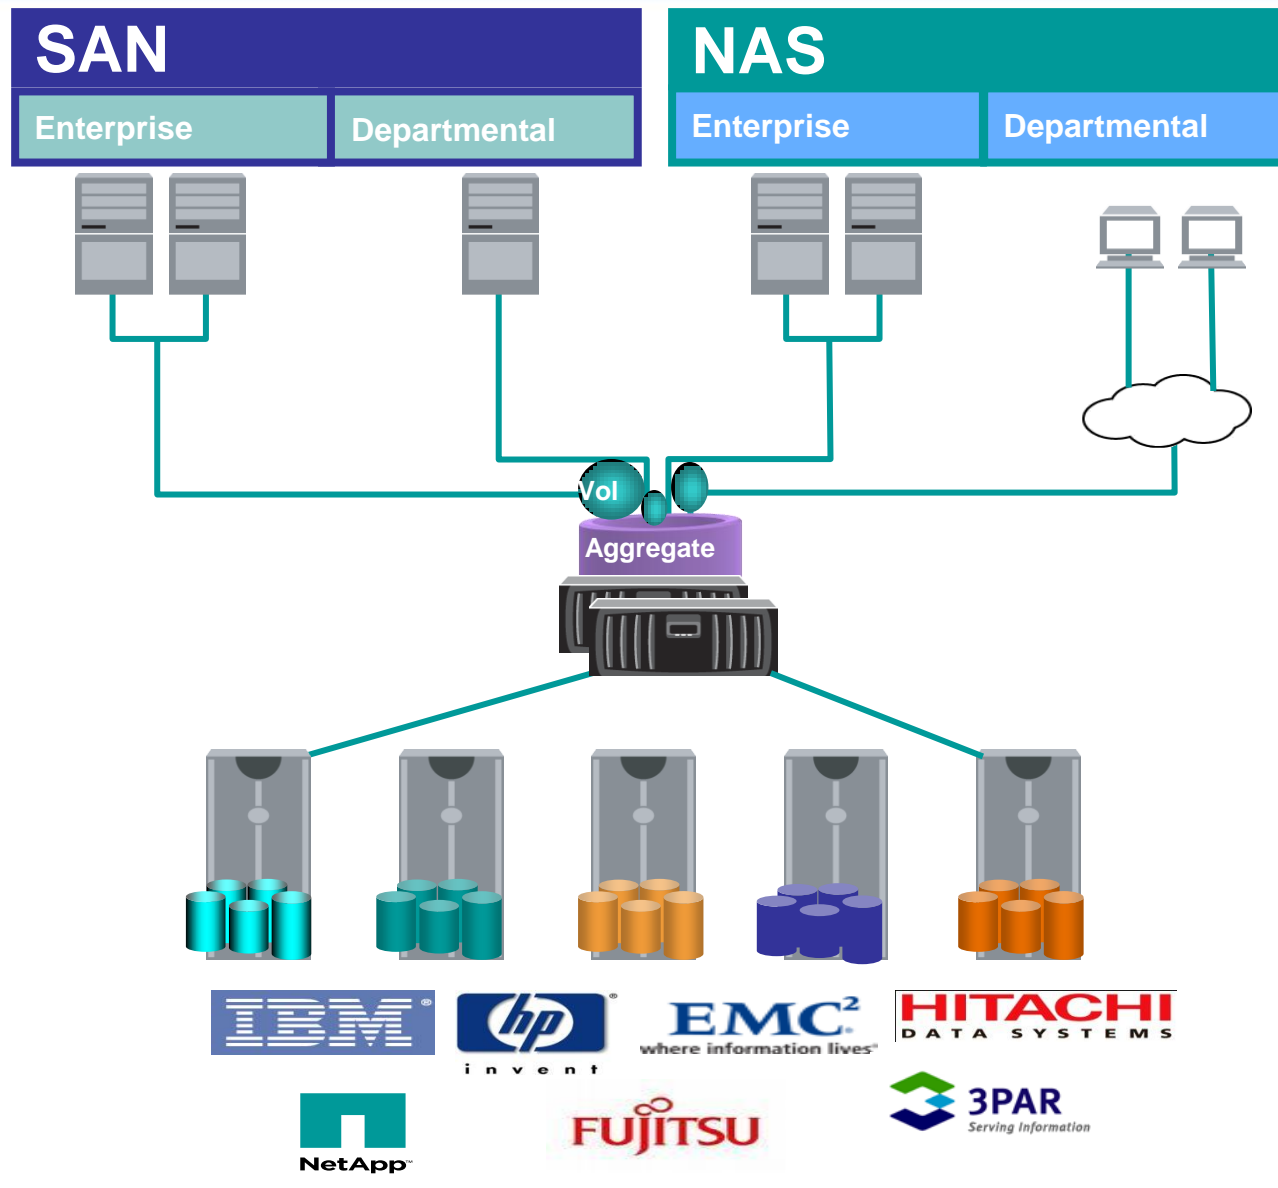

- Unified multiprotocol controller for Heterogeneous Storage.
- Comprehensive, end-to-end enterprise storage solution.
- Robust storage management.
- Single de-duplication technology across heterogeneous storage.
- Reduced CAPEX and OPEX.

Platinum Partner

V-Series Architecture

Unified Multiprotocol Storage Controller

Replication-Based Backup Drives Efficiency

- Automatic, application-specific, policy-based backup solutions.
- 10x faster backups and restores through integration—from days to minutes.
- 90% lower disk capacity through incremental-only snapshots & dedup.
- 75% reduction in management costs through process automation.

Siwel & NetApp – Proven Storage Leaders

The Right Hardware

- NetApp V Series – virtualization for Heterogeneous Storage.
- Enterprise-class scale and performance.

The Right Software

- Instant Snapshot based backup & recovery for critical workloads.
- Thin replication & de-duplication.
- Application aware intelligent storage.

The Right Partner

- Siwel will enable you to lower storage costs and increase efficiency today.
