Siwel's: The Prescription for a Painless Audit

[View the Webinar Video Now](#)

Webinar Overview:

For the past several years, software audits have been on the rise. Some ITAM organizations have admitted to spending as much as 50-75% of their time annually on audits! In this webinar, first we will review how software publishers select their customers for audits. We will identify the triggers, and tell you how to prevent them. Then we will make recommendations for managing the preparation and the actual audit process, providing the "prescription" for preventing an audit, or for ensuring that an unavoidable audit runs smoothly and painlessly. Join Siwel Consulting's Frank Venezia and IAITAM as they discuss what you can do to have a painless audit.
