Speech Analytics For The Cloud

ELEVATOR PITCH

APIs for speech analytics and recognition, powering insights every business needs.

DESCRIPTION

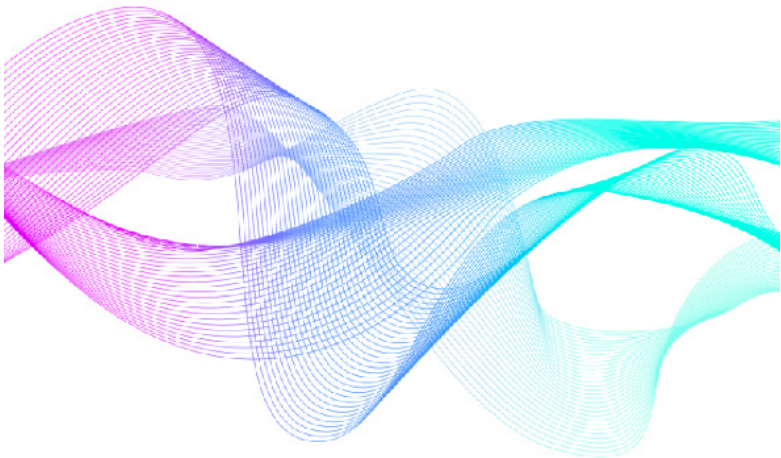

VoiceBase provides easy-to-use APIs that automatically transcribe audio and video, provide speech analytics with extracted keywords and topics, and predictive analytics based on machine learning.

VoiceBase allows users to search from the web or their mobile device into a recording, and play precise parts of a phone call, conference call, webinar, educational lecture, podcast, or video.

Enterprises make use of the VoiceBase platform for compliance, agent monitoring, 'voice of the customer', sales coaching and video captioning.

VoiceBase's customers include Twilio, Nasdaq, HireVue, FreeConferenceCall.com, Invoca and Callcap. The company is privately held and is based in San Francisco, California.
