Director of Development

We are seeking an experienced **Director of Development** to join the Confirmation.com team in our rapidly growing Del Ray Beach, FL office. The person in this position will work with an onshore and offshore team, and will work with other managers in the development organization. SCRUM experience is a must. This position requires a deep understanding of the Microsoft Development Tools such as MVC pattern, .NET, Angular, and SQL Server database. The person in this position must also have experience leading a development organization, and have a sound knowledge of architecting existing and new products.

Responsibilities
- Meets business needs by managing the activities of developers consistently delivering quality solutions on-time, within budget, and scope
- Provide technical leadership, vision, direction, and mentoring for multiple software development teams
- Deliver product and feature roadmaps and provide overall leadership and day-to -day management for multiple teams of software development professionals.
- Provide resource planning and project scheduling using Agile/Scrum software development methodologies
- Actively drives the development life-cycle from requirements analysis, feasibility estimates, design, code, documentation, testing, implementation, and support
- Support change management process to manage software releases, application patching and changes to production configurations
- Manage multiple tasks and responsibilities in high-pressure environments; excelling at pinpointing and resolving problems in early project stages to avoid cost/time expenses.
- Oversight and management of department expenses and budget planning
- Work closely with the Business Analyst team as well as other teams, developers and senior management to build new features and applications
- Attend business review and requirement meetings with clients and third parties as needed

Qualifications
- A Bachelor's degree in computer science or engineering from a leading 4-year college or university is preferred; or equivalent combination of education and experience
- Minimum seven years of .Net experience in developing web applications using C#, Angular, Type script, JavaScript, JQuery, CSS, HTML, Bootstrap, Entity Framework, and SQL
- Expert in using SCRUM software development methodology
- Solid knowledge of three tier application development and object-oriented design
- Experience working with software, hardware, data and testing standards
- Strong communication, analytical and problem-solving skills

Compensation
- Compensation commensurate with experience and education
