

Streamline your commercial credit inquiry responses in one secure place

Commercial credit inquiries are requests, sent by business managers, to verify details of a commercial bank account. Your responses help establish a client's credit valuation before extending terms on a sale. Requests can include: account type, balance in relative terms, opening date, and number of days overdrawn. Responding to these credit inquiries by fax, mail, or email is a time-consuming, disorganized, and unreliable process.

That's where Confirmation comes in. Our secure, online platform standardizes requests, allowing you to respond to more requests in less time, and it centralizes your records in one place... all while complying with regulatory requirements.

Confirmation bank network highlights

4,000+

banks and departments around the world use Confirmation

50

of the top 100 North American banks respond to credit inquiry requests through Confirmation

4,200+

credit managers are using Confirmation to request credit references

Free

Confirmation is completely free for banks. Credit managers pay for the service to receive quick and accurate responses.

Efficient

Confirmation's platform standardizes requests and helps eliminate manual work. No more tracking down faxes. Many banks report up to 90 percent time savings.

Trusted

Confirmation is used by more than 4,000 financial institutions and is an American Bankers Association endorsed solution.

Secure

Confirmation's services exceed industry standards and pass hundreds of security audits each year. The platform also complies with regulatory standards.
