

Protect Your Business this Holiday Season

The holiday season is upon us! Retail stores nationwide hire additional help due to an increase in customers, and dishonest employees (past and present) see this as a prime opportunity to strike. Here's how a rekeyable lock system secures your store this holiday season.

But first, a short holiday tale:

Randall the red-handed Thief was a keyholder at a retail store, but was fired due to his larcenous tendencies. However, he still has keys to the store and plans on making the most of it.

With InstaKey, you can change your company's locks immediately, rendering any previous keys useless. This will prevent former employees from returning without authorization.

Employee theft and fraud incidents increase approximately

30%

during the holiday season.

Save hundreds of dollars in steep holiday charges from locksmiths by rekeying your locks yourself.

Restore security immediately so that you can focus on store operations during this busy time of year.

This winter, don't let Randall the red-handed Thief throw a wrench in your store's holiday operations. Improve your store's first line of defense this holiday season with a rekeyable lock system.
