

The INSTAKEY Advantage: Cutting Your Rekeying Costs

Rekeying a large building can be a major budgetary drain. Here's a look at just how significantly an InstaKey® lock system can help you cut costs if you're ever faced with the need to rekey.

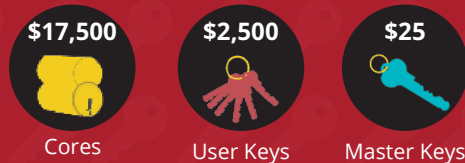

Hypothetical scenario...

Your building has **500 doors**, requiring:

With traditional SFIC Cores...

In the event that a master key is lost, each SFIC core and key would have to be replaced.

Total Cost: \$20,025

...And that doesn't even include the cost of labor to get new locks installed or the time involved to distribute new keys.

With InstaKey...

If a master key is lost, the cost to rekey is **only the price of replacing the 5 master keys.**

Total Cost: \$52

Making
KeyControl™
Simple.
