# KeyControl® Dashboard – Freight Analysis

The **Freight Analysis** chart reflects percentages of specific Ship Methods processed in the previous twelve (12) month period. To receive a detailed report of the specific orders Ship Method, click on the pie chart selection that corresponds to the method and the chart will prompt the numeric quantity and the detailed Orders report for further evaluation. Additional filtering can also be filterable by clicking on the legend to add/remove freight types.

The detailed **Freight Analysis** drill-down report reflects the Order Number, Ship Date, Receiving Location, Order Type, and Ship Method used. If a specific Order is in question, click on the Order Number and SecurityRecords.com® will be redirected to the Order Detail page for the particular Order's history. This report can also be easily revised by date and queried for export to Excel.

# KeyControl® Dashboard – Order Turnaround Time

The **Order Turnaround** chart provides a quick overview of the order fulfillment turnaround of Orders processed in SecurityRecords.com®. From the time the Order is entered, to the time the Order is closed and shipped, the graph displays the Orders in three (3) categories: 0-1 Days, 2 Days, 3+ days. To receive a detailed monthly report of the order fulfillment events, click on the chart's bar that corresponds to the month/selection in question.

The detailed **Order Turnaround** drill-down report reflects which orders were fulfilled within the timeframe selected. For further evaluation, just click on the Order Number in question for additional details regarding that particular material order request. This report can also be easily revised by date and queried for export to Excel.

# Key Detail – Key Name Addition

The **Key Name Definition** has been added to the Key Detail page. If a Key Name has been created, it will now be displayed on this page. With the ability to view this information on the Key Detail page, the End User has more visibility of the key type that is being issued/updated.

Please contact InstaKey Customer Support if you would like more information on how to assign Key Names in your database.

## Example:

Key Detail

Key:	D1000066	Key Actions
Key Name:	LP Office Only	<u>Update Key</u>
System:	Chain Store CSD 5X5 MK (D04)	Reports
Step/Type	1	View Key History
From Order:	<u>377</u>	
Door Association:	<u>10CA</u>	Add User
Currently Assigned To:	Doe, Jane	Attachments (0)
Status:	Issued 🗸	
Reassign Key:	● User O Location O Door type here to filter list ▼	
Last Updated by: Wulf, Ashley o	n 1/7/2015 1:14:27 PM	

# Cylinder/Key Report – Show All Button

A **Show All** button has been added to the Cylinder/Key Report page, so the End User is able to filter for all cylinders and keys associated to the door or location. Having the visibility of all associated cylinders and keys provides the historical tracking of cores/keys that have been deactivated or are not currently in use.

The Cylinder/Key Report will continue to default to the Show Active Only representation.

## Example:

Show Active Onl	lу				
Cylinder/Key Re	port				
Location Name CHAIN STORE 0029 - Ma	anhasset NY				
Cylinders: 12 (7 Activ	e)

# **Order Type – Additional Selection**

Additional selections have been added to the Order Detail screen's Order Type drop-down menu. Add **Core(s)** and **Master Key(s)** are now available options in the Order Type menu. These additions allow for further differentiation and classification of the Order's contents.

By using the Order Type field selection accurately, the KeyControl® Dashboard results display more detailed information.

# **Order Instructions – Add Notes from Templates**

An **Add Notes from Template** feature has been added to the Order Detail screen, allowing the End User to quickly add common template notes and instructions for more efficient order processing. These new templates can be created for commonly used Instructions and Notes provided on each Packing List. Once created, the templates can be named, used, modified, and placed in the desired notes fields for quick, uniform order processing.

# **Reports – Orphaned Keys – Toggle Update**

A new **Toggle Update** feature has been added to the Orphaned Keys report for improved data management. An Orphaned key is an active key that does not have any active cylinders to operate (closed stores, removed cores, etc.). While reviewing this report that identifies keys that no longer have a cylinder to function, the End User can quickly select all of them and update in a single click, providing much more efficiency for data cleansing.

Please contact InstaKey Customer Support if you would like more information on Orphaned Keys in your database.

# **Reports – Printable Hierarchy by Location – Export to Excel**

The Printable Hierarchy (By Location) report has been enhanced to allow for Excel export. By identifying the selection of information and clicking the Excel icon at the top of the screen, the information can be exported to Excel for additional data manipulation (sorting, filtering, modifying, etc.).

The most recent (un-manipulated) data can always be reviewed in SecurityRecords.com® by running the report and viewing the real-time data.
