## **Google Chrome – Google Sign-in**

InstaKey<sup>®</sup> Security Systems has added a new accessibility feature that allows Users to utilize their Google account to sign into SecurityRecords.com<sup>®</sup> quickly while logged into their Google account. It is required that the Google email address **MUST** be an exact match to an active User's email address published in SecurityRecords.com<sup>®</sup>.

This new feature works in all internet browsers **EXCEPT** Internet Explorer, so we recommend that Users begin using Google Chrome for this feature.

With this change, the SecurityRecords.com<sup>®</sup> login screen should now appear as you see below (except in Internet Explorer). The Google Sign-in button allows the User to setup single sign on using their Google account. Once the User has signed in, it will automatically sign in to SecurityRecords.com<sup>®</sup> each time the user comes to the SecurityRecords.com<sup>®</sup> login page. This will continue to function while the User is logged into the associated Google account.

		SecurityRecords.com
	Sign in to Security Records	
	Login Name: Protected ID: Login	
	G Sign in US Patents: 7,120,935   7,653,845   7,702,913   7,844,823   7,840,010   7,861,314	
Not	e: Security Records requires Internet Explorer 7.0+ to operate correctly. Downloar Forgot Password? <u>Click Here</u>	l it here.

### How to Setup:

**Option A:** If you don't have a Google account with an email matching your existing SecurityRecords.com<sup>®</sup> login, you can easily add a new email profile to your Google ID by creating a new Google account at <u>www.Google.com</u>.

#### Note:

The email address associated with the Google account **MUST** be an exact match to the User's email address published in SecurityRecords.com<sup>®</sup>. To make it match, you will need to select the "I prefer to use my current email address" option when entering your associated email address.

I prefer to use my current email address

#### How to Setup (cont'd):

**Option B:** If you already have a Google account, but the email address does not match your SecurityRecords.com<sup>®</sup> User login credential, you can add a new email account to your existing profile list using **Option A** above.

Once setup is complete, you can use the Google Signin process below.

# **Signing In**

When you first sign in to SecurityRecords.com<sup>®</sup> using the Google Sign In button, a second screen will open, allowing you to pick which account to use.

Pick the account you've set up with the matching email address in your SecurityRecords.com<sup>®</sup> User login credential. After verifying your Google password, SecurityRecords.com<sup>®</sup> should automatically log you in and allow you to login each time without the three-tiered sign in process <u>as long as</u> you remain logged into your Google account.

## Logging Out:

If, for any reason, you want to completely log out, use the <u>Logout</u> link in either Available Customer screen OR from the main SecurityRecords.com<sup>®</sup> header.

**Note**: Clicking either of the <u>Logout</u> links signs you out of SecurityRecords.com<sup>®</sup> and requires that you click on the Google Sign In button again for access.
