

Self-Coiling Scrolls

Vulcan Self-Coiling Scrolls are the key to a simple, versatile system for displaying prices, messages, and even pictures. Scrolls are ideal because they cost less than electronic and other digital readouts. Scrolls are simple to set up, use and adjust.

Scrolls are coiled strips of polyester film printed with numbers, words or figures. Our in-house flexo printing capability delivers high-quality color in PMS and other color systems.

Vulcan manufactures Self-Coiling Scrolls to your specifications. They can be custom made in any width up to 6', and in lengths up to 30". "Stop" holes in each end are available if needed.

Self-Coiling Scrolls are produced to the proper width and diameter to function smoothly in your application. No heat is used to form the scrolls.

Vulcan Spring is devoted to working with you to develop the best custom scroll for your application. Contact our capable team today to begin work on your Self-Coiling Scrolls.
