Procedure during commissioning

- Load default setting: Set P700.01 = 1
- Select language: P705.00 1 = English; 2 = German
- Basic setting V/f characteristic control:

*P208.01 Set mains voltage

*P303.01 Basic voltage = Rated motor voltage

*P303.02 Basic frequency = Rated motor frequency

*P210.00 Minimum frequency [Hz]

*P211.00 Maximum frequency [Hz]

*P220.00 Acceleration time [s]

*P221.00 Deceleration time [s]

*P430.02 Analog input 1: Min frequency value [Hz]

*P430.03 Analog input 1: Max frequency value [Hz]

Control of inverter by means of keypad

Set parameters:

*P200.00 = 1 (Keypad as control source) or
*P201.01 = 1 (Keypad as setpoint source)

Operation:

Reverse direction of rotation

Change frequency setpoint

Start/stop motor

Connection: I/O terminals

GND
AI1
AI2
AO1
10V
24V
DI1

24 VDC, 100 mA supply,
Start enabling

Control of inverter by means of terminals (default)

Set parameters:

*P450.01 Frequency setpoint presets: Freq. preset 1 [Hz]

*P450.02 Frequency setpoint presets: Freq. preset 2 [Hz]

*P450.03 Frequency setpoint presets: Freq. preset 3 [Hz]

Connection:

GND
AI1
AI2
AO1
10V
24V
DI1
DI2
DI3
DI4
DI5

GND

Frequency setpoint Input range [Hz]:
*P430.02 - *P430.03

10 VDC supply

24 VDC, 100 mA supply

Start

Reset error

Reverse direction of rotation

Activate preset (Bit 0)

Activate preset (Bit 1)

Flexible I/O configuration

Default setting
*P201.01 (configured AI1 as standard setpoint)

Optional external 24 V supply (only i550)
GND for analog and digital signals

Analog input 1 Config.: *P430.01 (0 ... 10 VDC signal)
Range [Hz]: *P430.02 – *P430.03

Analog input 2 Config.: *P430.01 (0 ... 10 VDC signal)
Range [Hz]: *P430.02 – *P430.03

Analog output 1 Config.: *P430.01 (0 ... 10 VDC signal)
Range [Hz]: *P430.02 – *P430.03

10V 10 VDC supply for potentiometer

24V 24 VDC, 100 mA supply, reference for digital inputs

DI1 Digital input 1

DI2 Digital input 2

DI3 Digital input 3

DI4 Digital input 4

DI5 Digital input 5

DO1 Digital output 1

GND GND for analog and digital signals

NO Relay NO-contact

COM Relay Middle contact

NC Relay NC-contact

DO1 triggered when Release brake DO1 triggered when Release brake

set Relay triggered when Ready for operation set set Relay triggered when Ready for operation set

- Set standard setpoint source** *P201.01. Run forwards/backwards (static), Start forwards/backwards (edge)
- Activate quick stop** *P400.03: Bring motor to a standstill in shortest time possible.
- Jog forwards** *P400.10 (Preset 05) and **Jog backwards** *P400.11 (Preset 06): Initiate status-controlled motor rotation with setpoint preset.
- Reverse direction of rotation** *P400.13: Invert frequency setpoint.

Diagnostics

P100.00 Output frequency

P102.00 Frequency setpoint [Hz]

P103.00 Current actual value

P125.01 Active control source

P125.02 Active setpoint source

RDY	ERR	Status/meaning
off	off	No supply voltage.
1 Hz		Safe torque off (STO) active.
		Safe torque off (STO) active, warning active.
		Inverter inhibited.
2 Hz		Inverter inhibited, no DC-bus voltage.
		Inverter inhibited, warning active.
		Inverter inhibited, error active.
		Inverter enabled and motor rotating or quick stop is active.
		Inverter enabled and motor rotating, warning signalled.
		Inverter enabled, quick stop as response to fault active.

Error message	Cause (W. = Warning, T. = Fault, F. = Error)	Remedy
.2382/.2383	Ixt error/Ixt warning.	Reduce load, adapt ramps.
.3210/.3211	Overvoltage DC bus/ Warning Overvoltage DC bus.	Ramp time too short or motor is running in generator mode.
.3220/.3221	Undervoltage DC bus/ Warning Undervoltage DC bus.	Check supply.
.3222	DC-bus voltage to low for switch-on.	Check supply.
.4310	Motor overtemperature problem (PTC).	Check ambient temperature and motor load.
.6280	Trigger/functions incorrectly connected.	In the case of flexible I/O configuration *P200.01, Inverter enable *P400.01 or Start *P400.02 must have been assigned to an I/O. Do not use Start forwards/backwards and Run forwards/backwards at the same time.
.FF37	Automatic start inhibited.	Remove start enable signal.

Reference Card Inverter i510/i550
