

Razberi Shield - A Smart Way To Pay

Finding Freedom and Flexibility with Razberi Financial Services

Razberi Shield is a monthly payment option for procuring your security and surveillance equipment. Shield works as a termed rental that puts you, the customer, in greater control. Shield offers added value and peace of mind to your solution acquisition.

Different than cash, bank loans, or traditional financing like a \$1 buyout lease, Shield is not a procurement option intended for ownership. Technology evolves and changes at a more rapid pace than ever. With Shield, you never have to be concerned about becoming financially handcuffed to a surveillance solution that no longer meets your needs.

The Added Value:

- **Solution Replacement Guarantee (SRG):** Shield guarantees that at any time during your contract term if your current solution no longer meets your needs, you can install new equipment without financial penalty. Your existing contract is completely forgiven.
- **Act of God Coverage:** In the event of a natural disaster, under Shield, Razberi Financial Services will cover your out of pocket insurance deductible on the damaged equipment up to \$5,000.
- **The OPEX Benefit:** Shield is designed to be an operating expense lease. Therefore, it qualifies for off balance sheet accounting. This type of treatment is often preferable and protects your debt ratios. In addition, the full payment is a tax deductible expense.

- **Flexible End of Term Options:** A lot can happen with your business or organization in 3-5 years. So decide what to do at the end of your term, not the beginning. Shield provides you with multiple end of term options that you can choose from at the end of the term so you do not have to pretend to predict the future. Renewing the agreement with SRG intact, renew without it, return the equipment, or you can even select a new system.
