

HOW TO ENSURE GOOGLE CHROME KEEPS YOUR ADOBE FLASH SETTINGS- DESKTOP

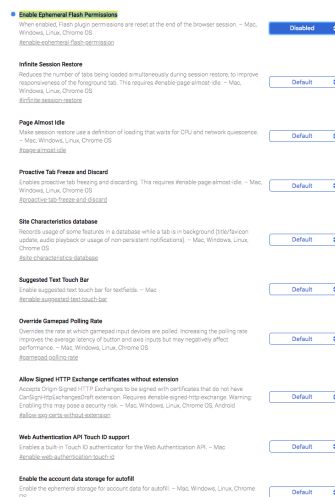

Do you keep receiving the message "Click to enable Adobe Flash Player" each time you access the sales-i home page within your newly updated Google Chrome? No worries! sales-i has found a solution to rectify this issue. Following the steps below will ensure that you can continue to use your shiny new Chrome and sales-i together.

01 Open your browser and copy and paste the script below within your browser web address tab:
chrome://flags/#enable-ephemeral-flash-permission
then, click Enter.

02 Change the first setting under the yellow header **Enable Ephemeral Flash Permissions** from Default to Disabled.

03 Next, select **Relaunch Now**.
Your browser will now restart and you will be able to use sales-i with no issues!
