Silverlon® Lifesaver Ag and Drain Pad Dressing Instructions for Use

Device Description

Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings are sterile, multi-layer, non-adherent, absorbent, antimicrobial barrier dressings.

Available as:

<u>Code</u>	<u>Pad Size</u>
Lifesaver™ Ag IV/CD-MINI	5/8" circle with 1.5 mm center hole
Lifesaver™ Ag IV/CD-15	1" circle with 1.5 mm center hole
Lifesaver™ Ag IV/CD-40	1" circle with 4.0 mm center hole
Lifesaver™ Ag IV/CD-70	1" circle with 7.0 mm center hole
Lifesaver™ Ag IV/CD-15-85	1.5" x 1.5" with 8.5 mm center hole
Drain Pad Dressing DPD-20-12	2.0" x 2.0" with 12.0 mm center hole

Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings deliver antimicrobial silver ions in the dressing when activated by moisture. The silver ions in the dressing kill wound bacteria held in the dressing and provides an antimicrobial barrier for bacterial penetration of the dressing which may help reduce infection.

Silverlon® dressings have been tested in vitro and found effective against microorganisms such as: Staphylococcus aureus (MRSA), Vancomycin Resistant Enterococcus (VRE), Staphylococcus epidermidis, Escherichia Coli (E. coli), Shigella sonnei, Pseudomonas aeruginosa, Pseudomonas cepacia, Pseudomonas maltophilia, Acinetobacter calcoaceticus, Enterobacter cloacae, Salmonella typhimurium, Salmonella typhi, Enterococcus sp., Serratia marcescens, Listeria monocytogenes, Enterobacter cloacae, Staphylococcus, Streptococcus, Group B Streptococcus, Candida albicans, and Aspergillus niger.

Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings have been subjected to independent standard in vitro and in vivo biocompatibility tests, including cytotoxicity, sensitization and intracutaneous reactivity. All tests were performed in accordance with the International Standard Organization (ISO) 10993 Standard Series for Biological Evaluation of Medical Devices.

Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings are not made with natural rubber latex.

Indications

Silverlon® Lifesaver™ Ag IV/ Catheter Dressing and Drain Pad Dressings are multi-layer, sterile, non-adherent, antimicrobial barrier wound dressings.

The Over-The-Counter Indications:

Local management of superficial wounds, minor burns, abrasions and lacerations.

Rx Use

Under the supervision of a healthcare professional Silverlon® Island Wound Dressings and Silverlon® Wound Pad Dressings are intended for up to 7 day use for wounds such as vascular access or peripheral IV sites, orthopedic external pin sites, wound drain sites, surgical wounds (donor and graft sites, incisions), and partial to full thickness dermal ulcers (stage I-IV pressure sores, venous stasis ulcers, arterial ulcers, diabetic ulcers).

Silverlon® Island Wound Dressings and Silverlon® Wound Pad Dressings are indicated for the management of infected wounds, as the silver in the dressing provides an antimicrobial barrier that may be helpful in managing these wounds. In addition, the moist wound healing environment and control of wound bacteria within the Silverlon® Island Wound Dressing and Silverlon® Wound Pad Dressing may help reduce the risk of wound infection and support the body's healing process.

PERFORMANCE. POWER. SPEED.

Silverlon® Island Wound Dressings and Silverlon® Wound Pad Dressings may be used for the management of painful wounds, Silverlon® Island Wound Dressings and Silverlon® Wound Pad Dressing's non-adherent wound contact layer reduces pain during dressing changes and evaporation of moisture in the dressing may soothe the wound.

Warnings and Precautions

Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings are intended for external use only. Contact a health care professional if any of the following signs or symptoms are noted:

- Increased pain, increased bleeding, increased swelling, increased wound drainage or increased redness in and around the wound site;
- There is a change in wound color and/or wound odor;
- The wound does not begin to show signs of healing;
and
- Any other unexpected symptoms occur.

Consult a health care professional when Silverlon® Lifesaver™ Ag IV/ Catheter Dressings and Drain Pad Dressings are used with other wound care products.

- Do not use past expiration date on the product packaging.
- Do not use if pouch is damaged or open.
- Do not use petroleum-based ointments or creams under Silverlon® Dressings.

Do not moisten Silverlon® Dressings with hydrogen peroxide or povidone iodine.

Some clinical studies have reported finding silver-resistant microbial strains when using silver based antimicrobial products.

As of April

2014 no adverse event or reports of Silverlon-resistant microbial strains have been received by Argentum.

Contraindications

- Do not use Silverlon® Lifesaver™ Ag IV/ Catheter Dressings or Drain Pad Dressings patients with known sensitivity to silver or nylon.
- Do not use Silverlon® Lifesaver™ Ag IV/ Catheter Dressings or Drain Pad Dressings on 3rd degree burns.

Adverse Reactions

N/A

Instructions for Use

- Prepare the skin around wound site according to hospital protocol.
- Select the Silverlon® Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressing with a hole size that is slightly larger in diameter than the catheter (or other device) protruding from the wound.
- Activate Silverlon® Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressing by wetting it with sterile water, distilled water, or normal saline.
- Place the Silverlon Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressing around the device protruding from the wound, so that the silver side of the dressing is in direct contact with the skin.
- Secure Silverlon® Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressing in position with a transparent film dressing.
- Silverlon® Lifesaver™ Ag IV/ Catheter Dressings or Drain Pad Dressings may be used for 7 days, but may require more frequent changing depending on wound condition and exudate build-up.
- To remove Silverlon® Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressings, first remove the outer dressing per local protocol, then gently lift the edges of the Silverlon® Lifesaver™ Ag IV/ Catheter Dressing or Drain Pad Dressing.
 - If the dressing sticks to the skin, moisten the dressing as needed with sterile water, distilled water, or normal saline, until it can be easily removed by gently lifting the corners.

Storage

Store Silverlon® Lifesaver™ Ag IV/ Catheter Dressings or Drain Pad Dressings in normal warehouse conditions. Keep dry. Avoid excessive heat or humidity.
