

ADS and Digital Realty: Cloud / ASP Security and Reliability Perfected!

The advantages of cloud computing today are well known:

- No server(s) to buy, support, maintain and upgrade
- Backups are continually performed and verified *for* the client, not *by* the client
- Users are assured the most recent application software versions are being accessed

You'll be confident in knowing that ADS and Digital Realty are solidly behind our clients' hosted services.

Digital Realty essentially maintains a 100% uptime rate and supports physical "specs" that include:

- Being outside a one hundred year flood plain
- UPS (power) and generator redundancy
- Cooling monitors for ideal, steady temperature control
- Reinforced concrete roof decking
- 24 x 7 x 365 manned security, card key and biometric access control, digital and video monitoring
- HIPAA and SOC3 compliance

The Digital Realty center is located less than fifteen minutes from the ADS Building making for easy physical access to our servers should that ever be needed.

What ADS brings:

- Solid, reliable remote diagnostics to our Digital Realty-hosted servers
- 24 x 7 monitoring and alerts to ADS IT team members
- In the unlikely event an issue is brewing, we'll know in advance to proactively address it before it happens
- Full-site replication to backup data center, at 5 minute intervals, for disaster recovery scenarios
- 30-day historical backup archive stored at both data centers
- Full hardware redundancy of all server, storage, and networking components for a robust environment approaching 100% uptime

Practices and RCM companies using their Medics systems in cloud / ASP format can do so confidently knowing that ADS and Digital Realty are behind the scenes monitoring and ensuring the round-the-clock connectivity ADS clients have come to expect, and get.

Contact ADS at **800-899-4237, Ext. 2264** or by emailing **info@adsc.com** for more information on the Medics Solutions Suite which can also be implemented in customer hosted format.
