

MedicsCloud EHR for Behavioral Health:

Special Features for Hospitals and Inpatient Settings

MedicsCloud for BH is a robust, comprehensive, yet affordable automation solution for hospitals and inpatient facilities of every size and scope.

The system has a seamless process for documenting psychiatric and Substance Use Disorder programs for children, adolescents, adults, and older adults.

MedicsCloud's documentation and workflow capabilities allow the user to follow most inpatient, outpatient and partial hospitalization protocols.

Extensive tracking for treatment plans / progress notes is generally a mandated requirement, and MedicsCloud EHR for BH handles these requirements easily.

The system has a highly flexible eMAR; complex medication dispensing and tracking is available within the system which also includes a full range of tools and alerts for allergies, interactions, refills, dosages, and formularies. MedicsCloud EHR for BH can also transmit prescriptions to pharmacies electronically for controlled and non-controlled substances.

A broad spectrum of services for inpatient and ambulatory services is handled by MedicsCloud EHR for BH:

- Mental Health and Substance Abuse Assessments
- Acute Psychiatric Hospital Care
- Sub Acute / Intermediate Psychiatric Hospital Care
- Intensive Psychiatric Outpatient, Inpatient and Partial Hospitalization tracking
- Intensive Substance Abuse Outpatient, Inpatient and Partial Hospitalization tracking
- Outpatient Services

Inpatient workflow is driven by the program(s) to which the person obtaining treatment is attached, each program having a unique set of forms that guides clinical workflow.

Contact ADS for an overview on the broad spectrum of system capabilities available for your BH facility.
