Intersystems Caché™ and Advanced Data Systems:

Where an Impressive Database Meets Remarkable Solutions

As a leading provider of automated healthcare solutions, we recognize our obligation to ensure that maximized system efficiency and workflow is available to our large - and growing - community of ADS clients.

That community, consisting of tens of thousands of Medics system users and hundreds of high volume RCM companies perform a myriad of functions *minute-by-minute every day*, rely on InterSystems Caché for its high-performance and highly reliable database technology.

Caché delivers database technology that provides multiple modes of data access. Data is only described once in a single integrated data dictionary and is instantly available using object and relational/SQL methods. Caché provides levels of performance, scalability, rapid programming, and ease of use unattainable using other database products.

Cache easily integrates with a wide variety of technologies and has an extremely high-performance runtime environment with unique data caching technology.

In the real world:

- more than two-thirds of the U.S. population is served by healthcare solutions that run on InterSystems

- all of the Top 15 Hospitals as ranked by U.S. News and World Report for 2014-2015 use InterSystems technology

- InterSystems' platform currently serves the needs of hundreds of thousands of physicians in every practice size and specialty, and thousands of hospitals, worldwide

- InterSystems has been recognized as a leader in the Gartner Magic Quadrant for Operational DBMS

Caché has a remarkable history in the industry in general, and with ADS and our clients. Caché is a proven, robust, responsive and widely used healthcare database. More in-depth technical information on Caché, and how InterSystems serves the healthcare industry can be found by clicking **here**.

InterSystems and the Caché database, and ADS and its Medics Solutions Suite have withstood perhaps the most powerful test of all: the test of time.

Contact ADS for more information on our Medics Solutions Suite, and how your practice or revenue cycle management company can benefit from those solutions, powered by Caché.
