

MedicsEnterprise™

Powerful ICD-10, Stage 2 MU Compliant Systems for

Enterprise Practices • IGPs • IPAs • Large RCM Companies

High volume operations such as these have BIG expectations and requirements of the systems needed to handle a super-high volume of transactions and processes.

That's exactly why so many of these practice types and companies rely on MedicsEnterprise. The core elements of MedicsEnterprise support:

- An unlimited number of physicians in a single or multiple specialties, as well as an unlimited number of system users, each with role-based access
- One single tax ID, or an unlimited number of secure tax ID Entities that are easily maneuvered without continual logging in and out
- Directories for organizations requiring separate practices within the organization
- One large location or dozens of locations of any size using bandwidth economically
- Master Patient Index (MP) architecture for identifying patients correctly
- A variety of immediate database crosschecks to produce an on-window listing of potential duplicate patients *as new patients are entered*, effectively eliminating duplicate entries
- WindowOne™ design placing commonly needed data on virtually every window and reducing, if not eliminating, “needles in haystack” searches; large practices can reduce mouse clicks by the thousands daily with WindowOne
- The built-in Medics Audit Trail which continually monitors system use, allowing Administrators to review activity as needed

High volume settings benefit from the Suite's ability to process:

- Superfast rates of multiple EDI and EHR transactions simultaneously, and accurately, with a **99% success rate** on first-attempt clearinghouse claims
- MedicsEnterprise contains the built in Medics ICD-10 Code Converter and Claim Denial Manager. Vision™ Claim Tracking is also accessible

- Centralized or de-centralized appointment scheduling with workflow along with powerful management and financial capabilities such as pre-appointment batch eligibility verification

- Reports and analytics that can be specific to one data field, or with data from across the entire practice spectrum

- Tax rate calculations and inventory management for practices with purchasable products

- All primary care and specialties are handled by MedicsEnterprise, including anesthesiology, behavioral health and radiology (MedicsRIS)

MedicsEHR is certified as a complete EHR for Stage 2 MU, is accessible in MedicsEnterprise for comprehensive, specialty-specific EHR. Integrations are available to other EHRs eliminating the need for physicians to abandon their existing EHRs. MedicsPM provides the comprehensive PM features in MedicsEnterprise.

MedicsEnterprise can be implemented in Cloud / ASP or customer hosted (client server) format.

MedicsRCM™ is also available if comprehensive, outsourced RCM services is a preferred option.
