

BobiBands are:

Tamper-Evident

Not much gets past the Bobiband. Our patent-pending design has been crafted in a way that is nearly impossible to remove by showing signs of someone attempting to break or remove the band. But easy for the customer to break off – no scissors required!

Able To Work On All Surfaces

We've tested our band on multiple product types including plastic, Styrofoam, wax cups, cardboard, and paper. The Bobiband can adhere to these containers damp (condensation) or dry, hot or cold. Ideal temperatures range from -65 degrees F to +160 degrees F (-54 degrees C to +71 degrees C). Bobibands has a dwell time of 4-5 mins where the bond strengthens.

Food Safe & Eco Friendly

The Bobiband is made from biodegradable paper in an effort to reduce waste. They are manufactured in an HACCP, ISO, and CONEG certified facility with an FDA approved non-toxic adhesive.

SKU	ITEM	CASE SIZE
BB03856	 3" BobiBands 1000 ctn Roll	3000 ctn
BB11856	 11" BobiBands 250 ctn Bundle	1500 ctn
