

RELEASE NOTE

Spotlight Forecasting 2.3
November 2016

We've improved Spotlight Forecasting by providing great flexibility around tax. Use the schedules for sales tax, payroll deductions, and superannuation to forecast when you pay your tax, and how much you pay:

1. Use our region-specific default payment schedules as a starting point.
2. Create your own payment schedules to meet the obligations of your practice and organisations.
3. Use our rules to manually enter specific tax amounts and payment dates for an individual organisation.
4. Run Scenarios to see how your balance sheet and cashflow forecast are impacted by various payment schedules.
