

RELEASE NOTE

Spotlight 3.21
5 April 2017

The latest update to Spotlight includes the following 'headline' enhancements:

🕒 MYOB AccountRight Integration

MYOB AccountRight users can now connect and import their data into Spotlight. The integration works across the MYOB AccountRight range (Standard, Plus, and Premier). Just select the MYOB AccountRight option from the Import tab, choose the relevant company file and click import. Just like our other integrations, Spotlight will import accrual, cash and budget data from MYOB AccountRight. Users will also be able to import and report on up to 75 jobs and categories when using Reporting and Dashboard for single organisations.
