

Smart Manufacturing

Bridging IT and OT

CONNECT

AUTOMATE

CONTROL

Improve processes and product quality on the manufacturing floor. Accelerate your organization's digital transformation with a unique brand of test expertise.

Smart Manufacturing

Accelerate Digital Manufacturing Transformation

Our professionals deliver **automated assembly, test systems, and data analytics** expertise that seamlessly combine with IoT migration within product development and manufacturing activities. Averna is the **preferred product quality** partner for global OEM leaders who want to accelerate their ability to leverage IoT value within industry segments.

Smart Digital Transformation

Industry processes like **digital transformation**, including the IoT and the **merging of IT and OT**, are rapidly reshaping the manufacturing landscape. Don't fall behind! Let our **test expertise** and extensive knowledge of ATEs confidently guide you through this new market reality.

Smart Test Systems

Product testing is key. Our Smart **Test & Measurement systems** deliver **superior testing** that results in fewer operational errors, **better data collection**, reduced test cycle time & cost, and **consistent processes** to help customers achieve their goals. Additionally, our **exceptional test strategies**, system architecture & replication, and vision inspection & high-speed robotics **evolve with your product** to promote manufacturing leadership and innovation!

Smart Test Data Management

Test data generates **quality and process improvements** across global supply chains, provides valuable insight on **manufacturing & test processes**, and enables real-time machine monitoring & system status information. Additionally, it produces essential KPIs like first pass yield, throughput, top defects, and TAKT time. Leverage our expertise to empower your **engineering, operations** and **QA** staff and optimize your product quality, **asset utilization**, and supply-chain activities.
