Position: Senior .NET Developer

About BioConnect
BioConnect is a rapidly-growing biometric technology and software company. We have set out on a mission to change the way society verifies identity. We believe that people want to use their true, biometric identity to verify who they are instead of relying on approximations of identity like keys, fobs, passwords and PINs that can be lost, forgotten or stolen. BioConnect has an incredibly unique vision and way of doings things, much like our team members. Our team is forward thinking, self-fuelled, relentlessly passionate and centered around unbeatable customer service. Our modern, open-concept office in the heart of Liberty Village, Toronto, is filled with energy, passion, and… dare we say it? Fun.

What you'll do:
- You will be responsible for running the day to day operations of the development team
- Lead the daily standup, to ensure the Product Management and the development teams are in alignment
- Focus on Agile Development and provide feedback during Sprints
- Manage the growing list of development features and manage releases as well as partnerships with software partners
- Be deeply involved in the defining of Requirements, specifications, and the design of the product from a technical point of view
- Manage timelines and expectations to ensure timely delivery of releases and functions/features

Key Responsibilities/Requirements:
- Understanding of .NET development, from Framework 3.0 to Framework 4.6
- Knowledge of C#, Native C++, WPF, WCF, and ASP.NET 4+
- Experience with Mobile development
- Customer First attitude
- Understanding of Best practices for Agile development
- 5+ years in a multi-faceted development team
- 2+ years leading a development team
- Experience in Customer support, and or tier 2+ Tech support role

Need to haves:
- Understanding of Cloud and Client/Server testing methodologies
- Ability to do in depth technical writing
- Experience in Access Control market
- Experience working with Biometric Devices or other Hardware technologies, like mobile or Raspberry Pi's

So, do you think you have what it takes to join this fast-growing team?
