

Smart Business Restructuring

Business Restructuring Challenges

Business restructuring projects are challenged by:

- It's hard to understand the level of SAP system customization.
- It's hard to compare multiple SAP systems to understand business process and technical differences.
- It's hard to understand the impact of change on business processes and technology.

Smart Analytics

- LiveCompare automatically analyzes all SAP systems' configuration, code and data to discover what's the same, different and unique.
- LiveModel reverse engineers live SAP systems, including all customizations, and summarizes the technical detail in an easy to understand, interactive business process model.
- LiveInterface speeds up data transformation and eliminates the need for staging servers.

Zero Defects

"That [restructuring] project was executed using the IntelliCorp analysis software tools for the first time. The results achieved were:

- *72% reduction in project plan execution*
- *95% reduction in staffing required*
- *87% reduction in IT expenditures*
- *100% of code changes were correctly identified"*
