

Smart S/4HANA Analysis

Prepare

Begin your SAP HANA migration with a fast upgrade to the latest Enhancement Pack using LiveCompare and LiveModel.

Use LiveCompare to understand the technical aspects of the migration, from impacted custom code to user training needs.

Use LiveModel to understand the impact on your business process and opportunities for simplification.

Implement

Understand what to test and why when migrating to S/4 HANA. Integrate with third-part testing solutions (e.g. HP ALM/QC) and discover what's testable. Examine the migration from five key perspectives: development, testing, integration, security and training.

Minimize your landscape freeze with effective dual-maintenance support.

Optimize

Maximize business agility and eliminate risk using LiveCompare.

Change and test SAP applications fast with zero defects.

Reduce test scope by at least 85%.

Right-size in-memory HANA footprint.
