

Migrate to SAP HANA®

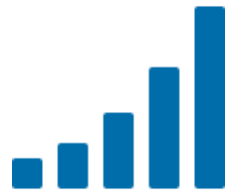

Prepare SAP Systems

Get up-to-date on the latest Enhancement Pack. Use IntelliCorp software to automatically identify the impact of change, what to test and why. Understand which transactions and screens will be impacted and who will need training.

Clean up custom code, analyzing quality and complexity, tracking back to who created the code. Identify where you can move back to standard code.

Upgrade SAP Systems

IntelliCorp software enables fast, low-cost and safe upgrades for custom releases, support packs, enhancement packs and SAP HANA transformations. Our automatic upgrade analysis simplifies five key project activities:

1. Development
2. Testing
3. Integration
4. Security
5. Training

Manage And Maintain

Change to SAP applications doesn't stop after an upgrade. Manage and maintain SAP systems using IntelliCorp software.

1. Right-size systems to reduce the cost of memory without compromising system performance.
2. Optimize custom code.
3. Manage the whole SAP application lifecycle.
