

Smart SAP Application Licensing

Reduce License Costs

Answer key questions about your SAP application license use:

- What licenses are in use?
 - How many professional tier accounts do we have and are they used correctly?
 - Are there unused licenses that we can re-use?
 - Do we have any duplicate licensed users?
-

Minimize Audit Risk

Use IntelliCorp software, LiveCompare, to ensure compliance with your SAP contract and avoid unplanned, future license spend.

Analyze your user Roles, looking at potential vs. used and analyze SAP Professional Users: assigned vs. used.

Analyze License Usage

Identify accounts that are assigned the Full Professional license type. Identify accounts that are:

- Dormant.
- Only using SAP for time entry.
- Only running minor transactions such as queries, reports and view/display.
