

Upgrade to Enhancement

Pack 7

Why Upgrade?

- SAP delivers over 100 new functions in EhP7
 - Stay current
 - First step to SAP HANA
 - SAP Fiori
 - Faster MRP runs
 - Data Aging
-

The Upgrade Challenge

- Lack of visibility, limited resources and tight time frames
 - Custom code: What will break?
 - Custom code quality and performance
 - What should we test?
 - How will business users be impacted?
 - How can security and authorization teams look at the changes in authorizations and roles of users.
 - Managing ongoing projects in line with the upgrade – keeping systems in synch
-

Using LiveCompare

- Analyze custom code and understand what will break
- Reduce testing by 85%
- Minimize the freeze period
- Analyze impact on integrations
- Analyze impact of change on roles, profiles and authorizations
- Analyze the impact of turning on a new business function
