

Prysm Application Suite - Skype For Business®

Increase team engagement and productivity with the Prysm Application Suite's breakthrough virtual workspace environment and Skype®, the leader in VoIP. Instantly connect to your Skype for Business contacts via audio, video or chat from within the Prysm Application Suite workspace environment to share and collaborate on work files. View and annotate on multiple files or launch the integrated Application Suite web browser to research information in real-time while broadcasting the workspace content to all your available Skype for Business contacts. The Prysm Application Suite's project based architecture allows users to organize and revisit workfiles from past meetings, like a self-contained virtual room, where all files, notes and open applications reappear where they were last left — a true compliment to the instantaneous meeting features of Skype for Business.
