

UI/UX Designer

Working closely together with the development and marketing team, a UI/UX Designer gives creative input and creates the best possible experience for our users. We are looking for a creative, analytic mind who has a natural sense for aesthetics and pragmatism.

You will love this job if you're:

- **Creative**, you are full of ideas and can combine visual appeal with usability. While adhering to conventions, you still retain a sense of originality.
- **Empathetic**, you know the whole user journey and have an understanding of problems users have when operating our product with the result of an intuitive interface.
- **Self-initiative**, you autonomously make suggestions on how to improve user experience and create concepts in consultation with the development team.

Your challenges will be:

- Creating templates and prototypes based on given requirements
- Create responsive layouts for our website
- Build a component library based on Bootstrap which can be used by developers
- Identify UX problems and make suggestions to improve our product

You are especially experienced in:

- Common mockup and design tools like Illustrator, Photoshop, Sketch, etc.
- Plus: HTML/CSS/JavaScript
- Having a feeling for aesthetics
- Layouts suitable for mobile devices

Our highlights:

- Awesome team with flat hierarchies
- Centrally located offices with good traffic connection
- Employee benefits, e.g. discounts, fresh fruit, beverages, fitness & sporting activities
- An open culture encouraging creativity for new ideas
- Working directly with top individuals in the startup ecosystem
