

Infor SunSystems Query and Analysis

Insight on demand

Knowing what direction to take in business is essential. Whether it's acquiring new companies, launching new products or other avenues of pursuit, it's important to know where you're headed and why and that takes real business intelligence and reporting proficiency.

With Infor® SunSystems Query and Analysis, you can get 24/7 access to real-time information to make informed recommendations and strategic decisions.

Information when you need it

Get a top-down view of your entire business with this dynamic analysis and reporting application's powerful analytical capabilities.

More than 10,000 customers from organizations of all sizes around the world use Infor SunSystems Query and Analysis to help them make business intelligence and reporting easier and more accurate. With reporting tools that include compliance and regulatory factors, Infor SunSystems Query and Analysis gives you the information you need, where and when you need it, fast and efficiently. Easily make changes to meet your growing business needs, and even expand to more robust querying and analysis tools.

Power made easy

With Infor SunSystems Query and Analysis, you get intuitive desktop applications with a familiar user experience. Users can get up and running quickly with minimal training and technical skill because the software is integrated with Excel®.

- Quickly and efficiently create reports that highlight trends, patterns, and exceptions.
- Get dynamic, multi-language, multicurrency, business intelligence tools that are powerful, flexible, secure, easy to use, and are in a consistent interface throughout the software.
- The software needs minimal IT support and involvement which makes the maintenance easier.

- Perform queries the same way across multiple applications and pull the resulting data into a single report.
- Quickly and easily analyze business data, measure performance, and be more reactive with access to real-time data.
- Make inquiries in many ways, and get multiple options for visualizing data.
- Schedule your analyzes and reports to run at any time.

Turn insight into action

Infor SunSystems Query and Analysis 11 is a cloud ready solution that uses internet communication to deliver the data you need from a server based query service to your desktop Excel. With Infor Q&A 11, you can:

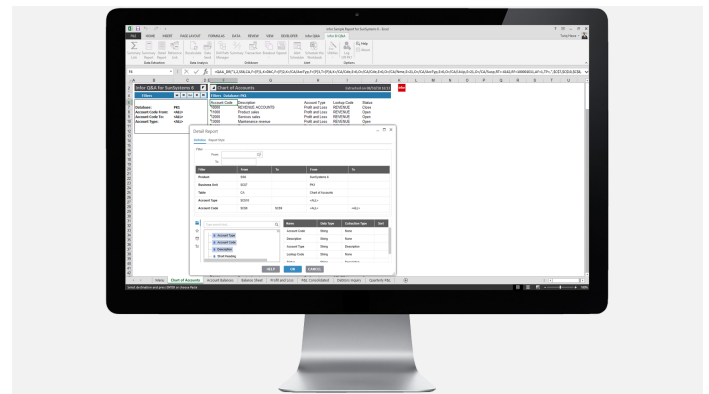

- Make informed and strategic decisions with confidence anytime and anywhere.
- Flexibility to drill down, breakout and expand views at both a detailed transactional level and/or summary level.
- Employees from all lines of business can increase efficiency and streamline operations.
- Easily analyze trends, problems, and opportunities that are often concealed within corporate transactional data.
- Save frequently used analysis procedures and replay them in the future.

Empower your employees

With the Infor SunSystems Query and Analysis family of ad-hoc query and reporting tools, technical and non-technical users alike can easily get the precise information that's relevant to their roles and tasks and generate reports with the intuitive and efficient interface.

With Infor SunSystems Query and Analysis, anyone in your organization can get 24/7 access to real-time information to make the right decisions at the right time.

You get intuitive analytics, business intelligence, reporting, and alerting. Working in familiar environment, your employees will be empowered to find the information they need to make better decisions, faster.

Select accounts you want to further analyze from SunSystems and export them into Excel just in a few clicks.
