

Infor SunSystems

Grow with flexibility

To succeed in today's global business environment, you need a financial management system (FMS) that seamlessly transcends borders, languages, and currencies. You also need to be able to make informed business decisions; but to do that, you need access to critical, real-time information when and where you need it. You get all this and more with Infor SunSystems®—an easy-to-use, modern FMS that's powerful enough to meet your needs today, and innovative and flexible enough to adapt as your business evolves and grows.

Integrate

Infor® SunSystems delivers integrated financial management, sales management, purchasing, and inventory solutions to 9,000+ customers in 190+ countries. For 30+ years, Infor SunSystems has been meeting the needs of the hospitality, non-profit, banking and insurance, upstream oil and gas, and other industries across the globe. Like many of these organizations, you can run your entire businesses on a unified platform by integrating and extending Infor SunSystems with additional business systems (whether Infor or non-Infor), such as enterprise performance management (EPM), customer relationship management (CRM), expense management, and more.

Take your business global with Infor SunSystems' built-in international support and real-time analysis and reporting capabilities.

Grow your business

Whether growth means new markets, acquisitions, or products, you need to adapt and respond to unique requirements with ease—and speed. With Infor SunSystems, you can standardize financial management and adjust accounting structures quickly, easily, and without breaking the bank.

With Infor SunSystems, you can:

Have a global presence

Be ready to handle any challenges you might face with the internationalization of your business. Whether your business is growing, expanding, or moving into new territories, you'll be able to meet local language, currency, regulatory, and tax requirements with Infor SunSystems' built-in global support.

Leverage one solution for all your needs

Simplify system management, streamline processes, and make your business less complex with one solution that brings everything together across different sites, countries, business units, companies, and corporate offices—and is flexible enough to handle their varying requirements.

Provide a consistent and auditable environment

Comply with local statutory, audit, international financial reporting standards (IFRS), and other regulatory requirements with built-in audit trails, alerts, and sophisticated data reconciliation. You'll easily be able to handle simultaneous financial reporting requirements in multiple countries.

Integrate information

All your ledger data can be combined in one place, whether it's from your general ledger, sales and purchase ledger, or even a user-defined ledger—without having to wait for batch updates or reconciliations. With a unified ledger, you'll be able to close your books faster, lower costs, and increase efficiency.

Improve corporate performance

With Infor SunSystems' single, integrated environment, you can streamline your reporting and planning cycles processes. You can realign analysis and reporting to meet your evolving business needs, as well as immediately see and be able to report on any change you make. You'll also be able to make it easier for users and stakeholders to understand how your business is performing with immediate, real-time reporting and analysis capabilities. Decision-makers can get immediate access to the integrated finance and operational information they need to better manage their business.

Increase information accuracy

By capturing all the detail you need in the source system, you'll be able to get a clear, complete view of your business from the very start. With Infor SunSystems, you can use spreadsheets as they were actually intended—to analyze the data in your system, not as an alternative place to store it. Because your financial information comes straight from the source, you can be confident it's accurate and up-to-date. Because you'll never again be locked into a static structure, you'll be able to:

- Quickly incorporate new product lines, organizational changes, and acquisitions.
- Ensure measurements and key performance indicators (KPIs) match the state of your business today.
- Protect your investment for the future, and limit reliance on IT for business-level needs.

Drive smart business decisions

When you can see the impact of all your financial transactions as well as the trends that may affect your business tomorrow, you have a potent strategic advantage that benefits every aspect of your organization.

With Infor SunSystems, you can make better decisions with:

Financial management

Get immediate access to all finance and accounting information, so you can make fast and effective decisions about all aspects of financial management—including nominal ledgers, payable and receivable ledgers, consolidation, corporate allocations, multiple currencies, dual-base currencies, fixed assets, and debtor management. And because of Infor SunSystems' flexibility, you'll be able to meet evolving accounting and reporting requirements—from changing local compliance requirements and multiple GAAP standards to updated IFRS standards.

Performance management

Turn data into meaningful information, and then deliver it to the right people, in the right format, at the right time. With Infor SunSystems, you can streamline consolidation, reporting, and analysis of data from third-party organizations and legacy applications, and gain insight into every aspect of your business that matters to you. Plus, you can deliver financial and operational KPIs to managers at every level, helping them make better decisions, faster. As a result, you'll be able to simplify your budgeting, forecasting, and other financial planning processes.

Purchase management

Improve efficiency and reduce costs by being able to maintain tight oversight over the purchasing activities over large numbers of employees with robust spending control and management capabilities. You can allow your employees to manage their own purchasing requirements, while operating under rules and workflows you've defined and automated to enforce corporate policies. You can also raise requisitions directly from within Infor SunSystems and have them automatically pass through a multi-level approval workflow.

Order management

With Infor SunSystems, you can take complete control of your sales, purchasing, and inventory management, and seamlessly integrate your operations with your partners and customers. You can configure order processes and sequence your transactions the way you want to, access any associated documents you need, and automatically update your ledger and inventory in real time.

Empower your workforce

Infor SunSystems is powered by Infor Xi—a next-generation technology platform that leverages the convergence of information, analytics, cloud computing, mobility, and social business. With Infor SunSystems, you'll be empowered to interact with systems and other business users like never before.

With Infor SunSystems, you'll have access to:

Consumer-inspired user experience

Your users will appreciate how Infor SunSystems balances simplicity, speed, security, reliability, and performance to give them a smart, intuitive, and easy-to-use experience. Every aspect of the solution—from design to use in production—has been improved, modernized, and simplified.

Social business

With Infor Ming.le® integration, you can take collaboration to new heights with social business technologies. You can create a centralized space for communications, ensuring that information is accessible, auditable, and never gets lost.

Integration platform

Via Infor ION®, you can seamlessly integrate Infor SunSystems with any other enterprise and financial systems. This purpose-built, middleware solution provides a simple, but powerful and scalable framework that allows you to eliminate operational silos, dramatically improve exception management, and achieve unparalleled end-to-end efficiency.

Document management

With just a few clicks of your mouse, you can automatically capture, authorize, and archive any kind of business document, such as invoices, purchase orders, and statements. These documents can be contextually attached to specific records, and can be searched and instantly available from within Infor SunSystems. As a result, you can save time, money, and storage space, and also comply with increasing regulations—all while supporting your company's green initiatives.

Flexible deployment

You can securely deploy Infor SunSystems in the cloud, a hybrid configuration, or on premise—globally. And with built-in Unicode support and translation for all major world languages, users can access the system in the language of their choice. Additionally, data can be entered and stored in any required language—all within the same installation.

Adapt to any market

With Infor SunSystems, you'll have access to today's best financial management practices and the power to address your key business challenges. You'll be able to seamlessly adapt to change, get the information you need when you need it, and grow in any market. Plus, you'll be able to make the right decisions, at the right time, every time.

You'll get everything you need to:

- Expand internationally without having to add new systems.
- Get up and running quickly in a new country.
- Standardize financial management across countries.
- Comply with multiple regulatory and reporting requirements.
- Concentrate on your business without worrying about your systems.
- Simplify support worldwide.
